quad / hover — PASS — Minecraft réel

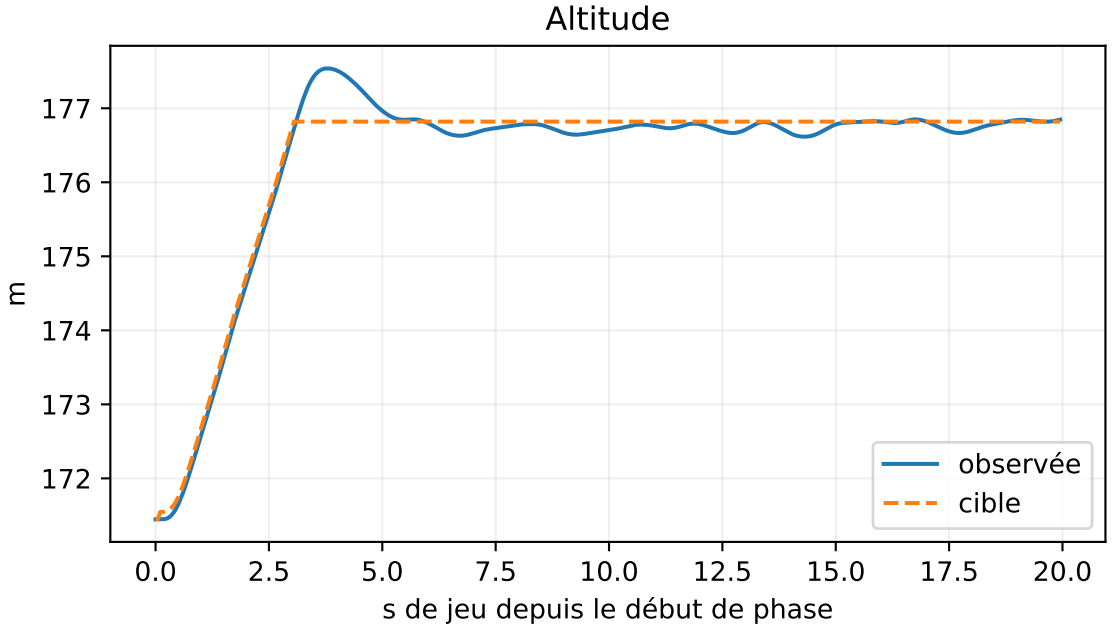

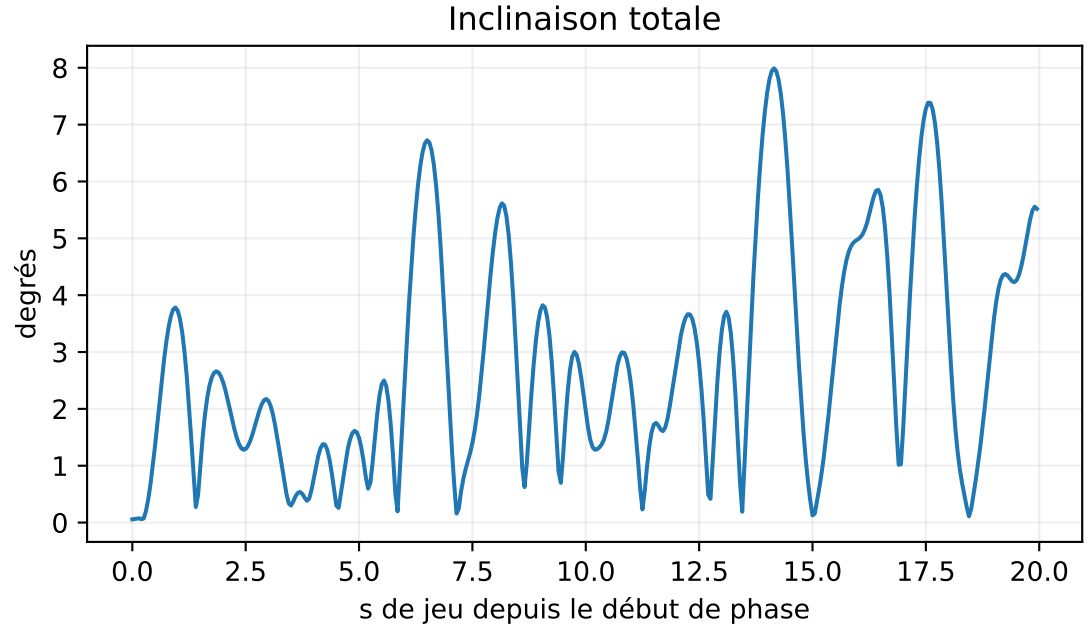

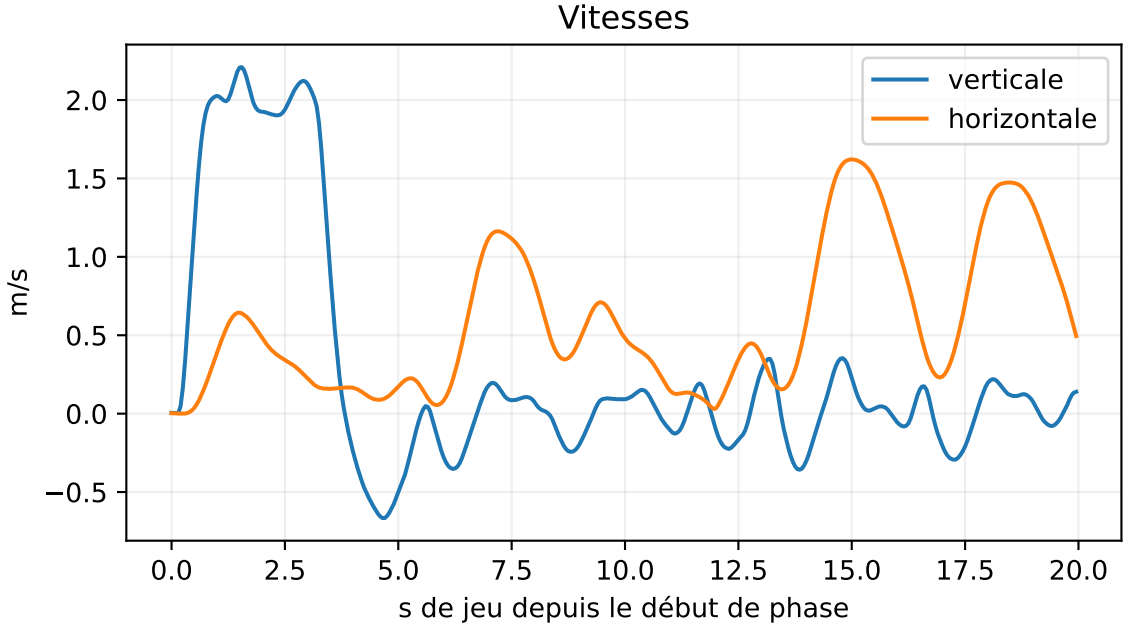

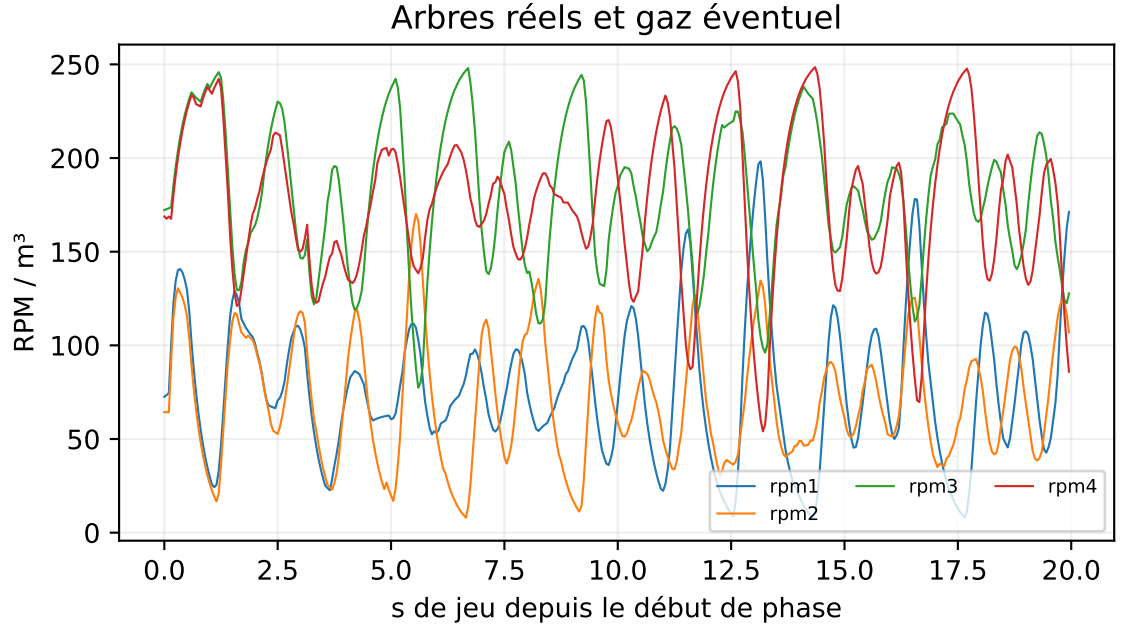

Construction native, vérification mécanique avant armement ; charge et géométrie propres à ce modèle. Qualification globale : non.

quad / climb — FAIL — Minecraft réel

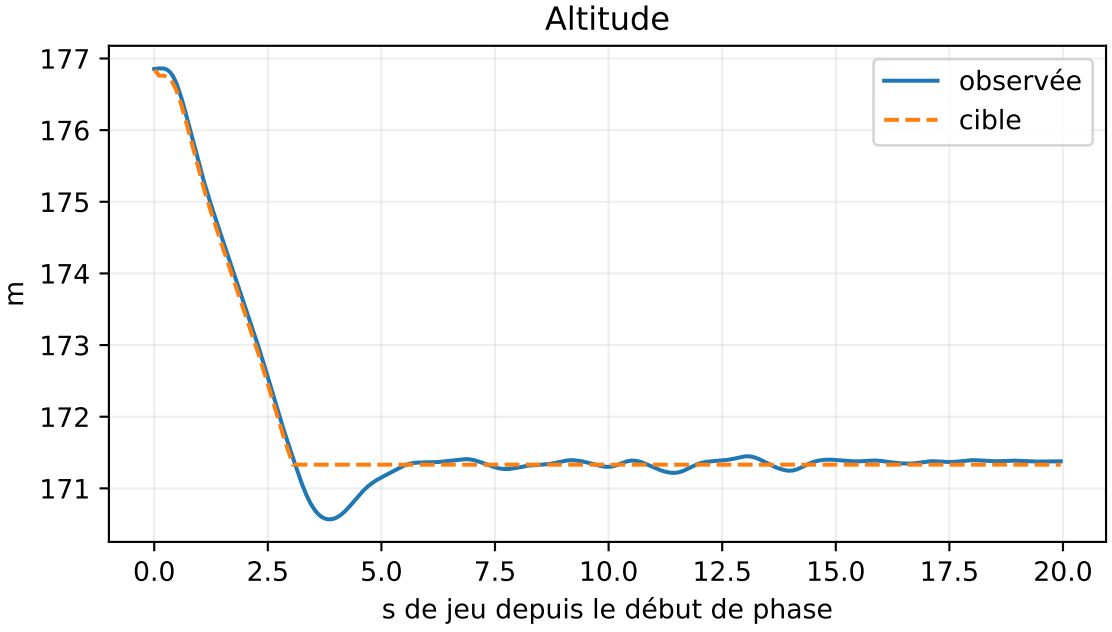

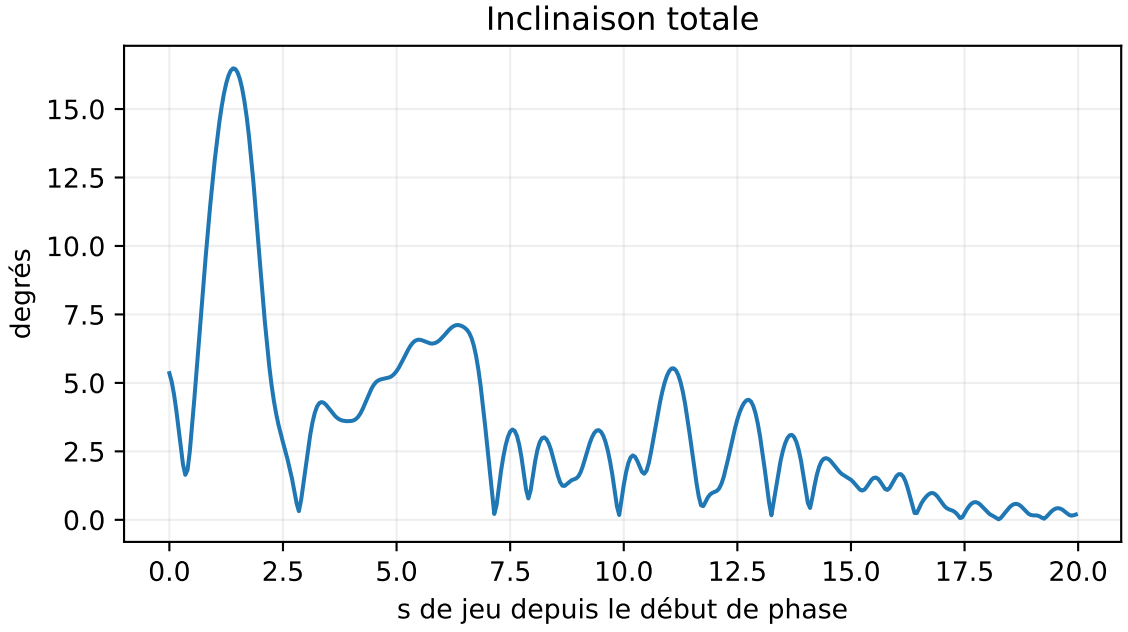

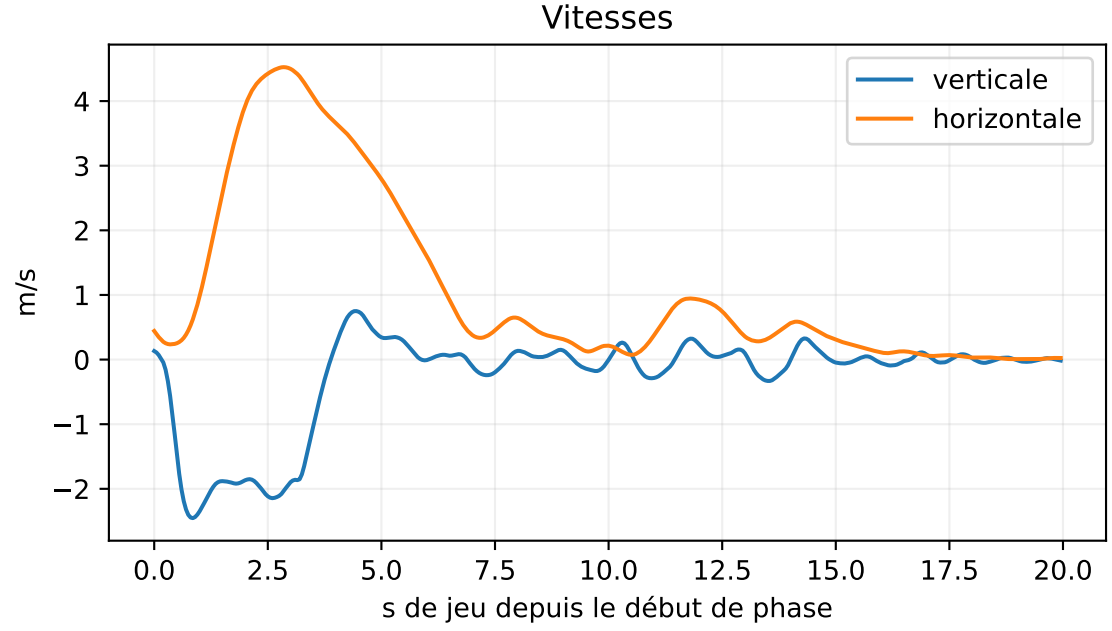

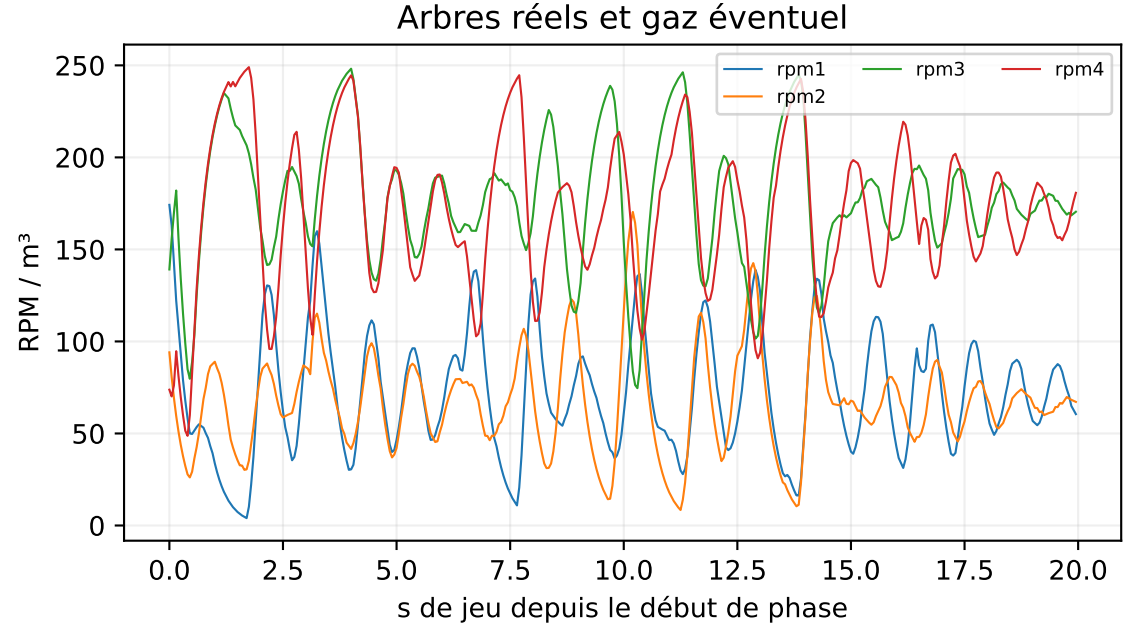

Construction native, vérification mécanique avant armement ; charge et géométrie propres à ce modèle. Qualification globale : non.

quad / descend — FAIL — Minecraft réel

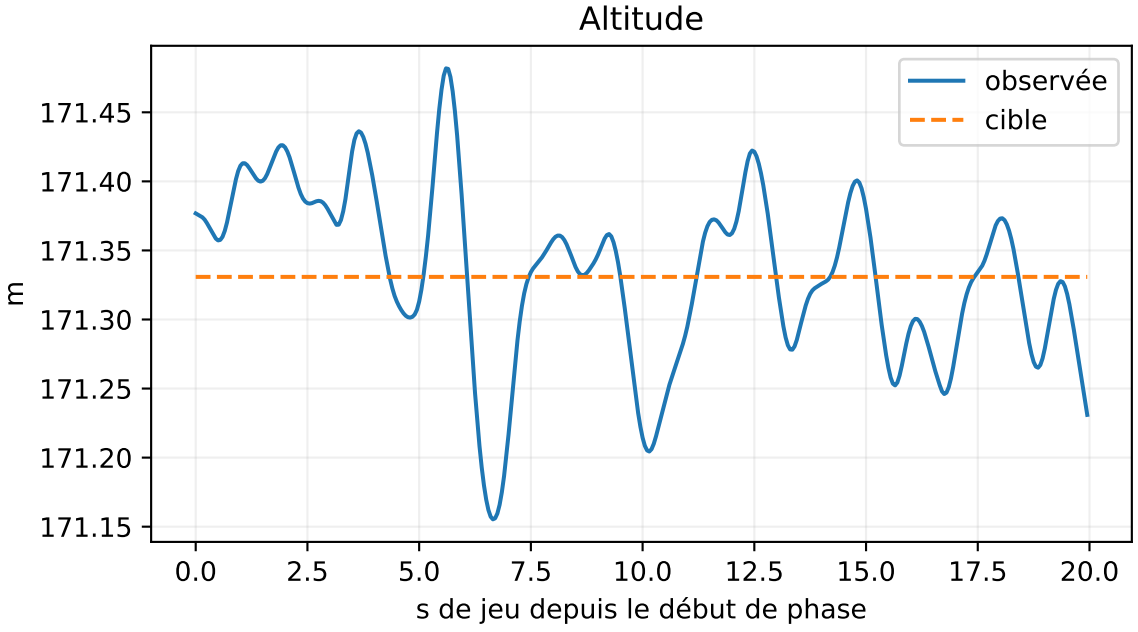

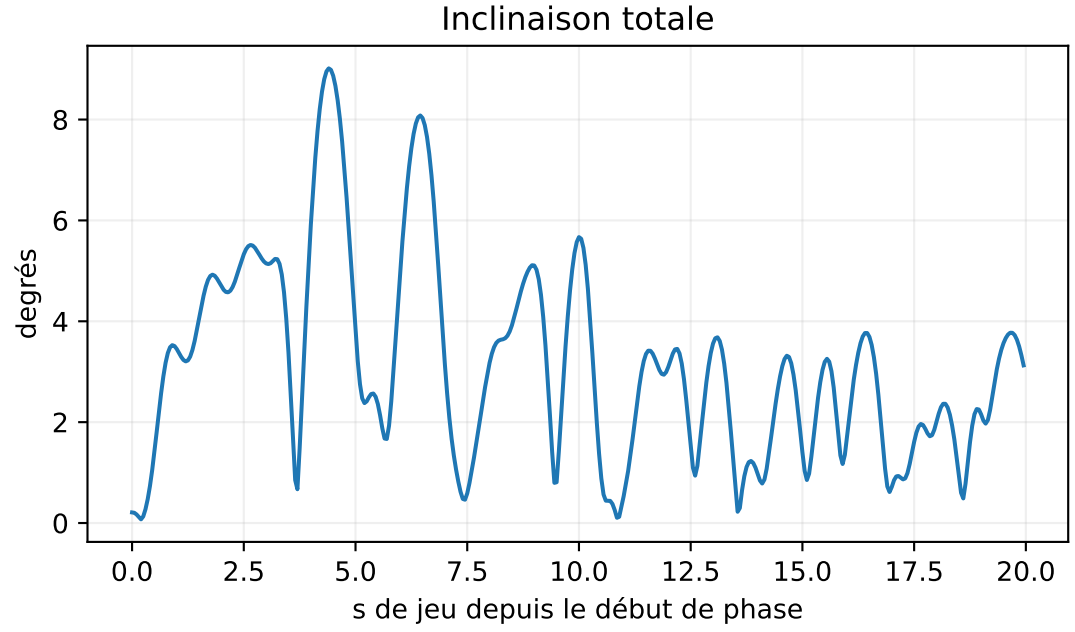

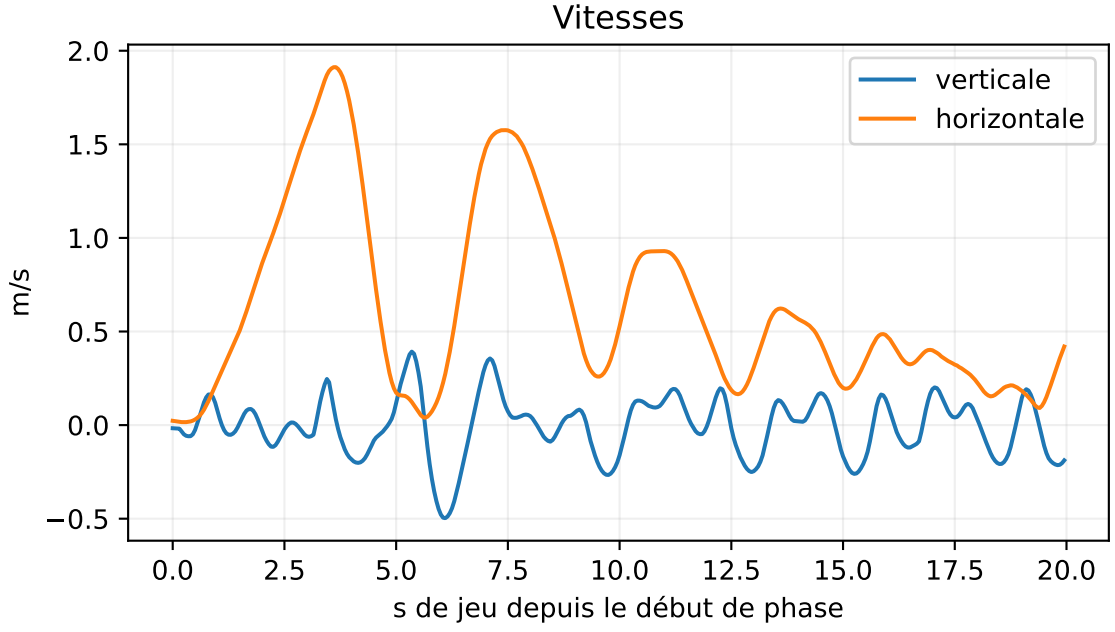

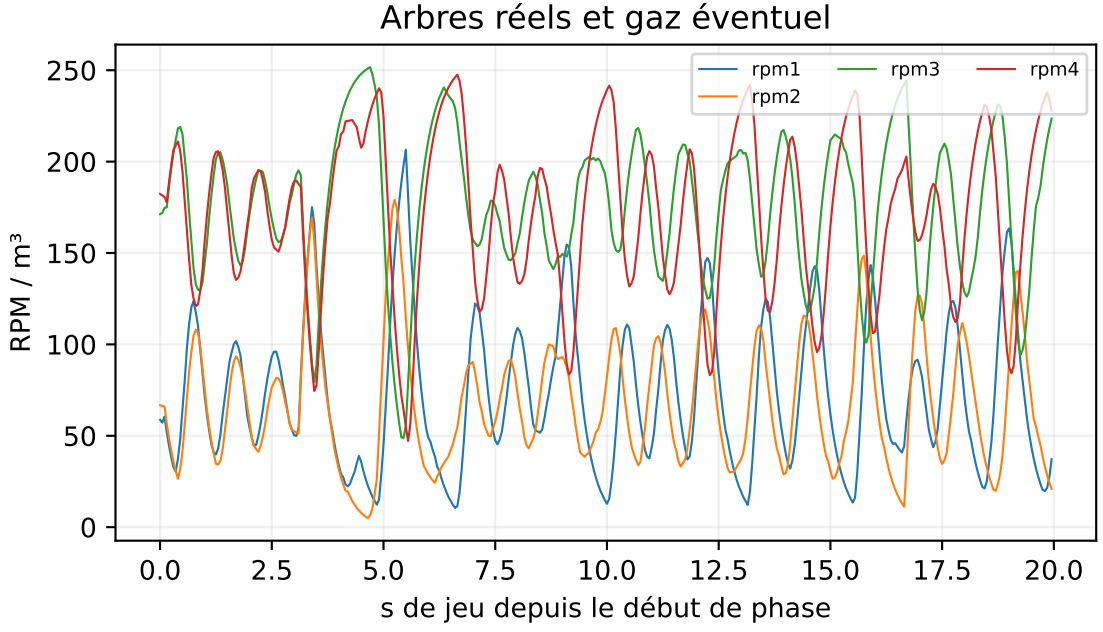

Construction native, vérification mécanique avant armement ; charge et géométrie propres à ce modèle. Qualification globale : non.

quad / forward — FAIL — Minecraft réel

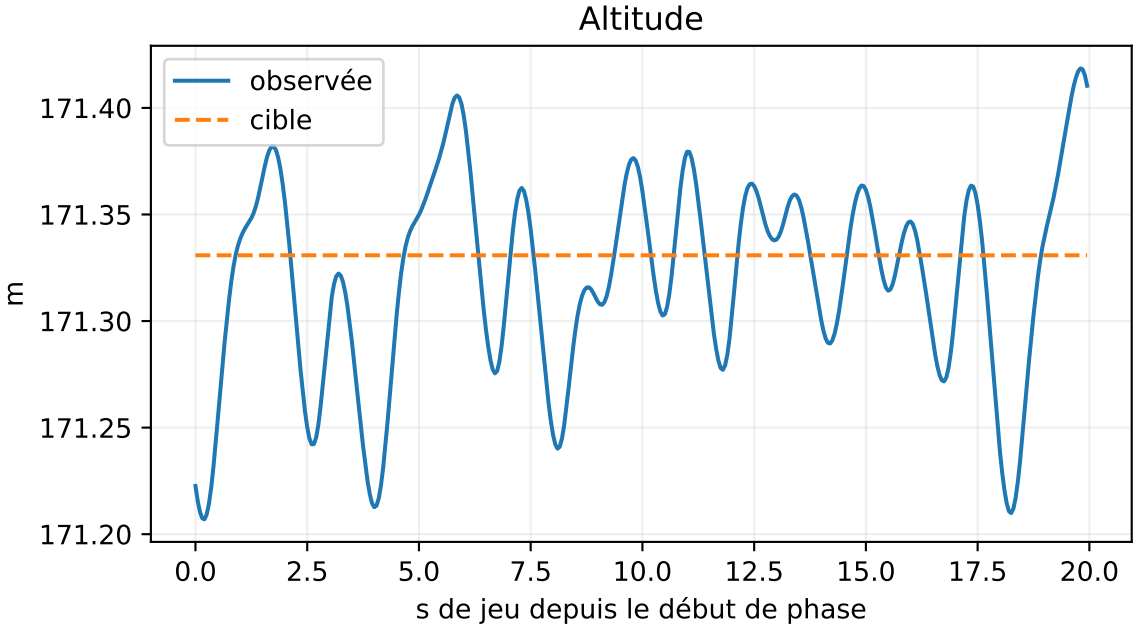

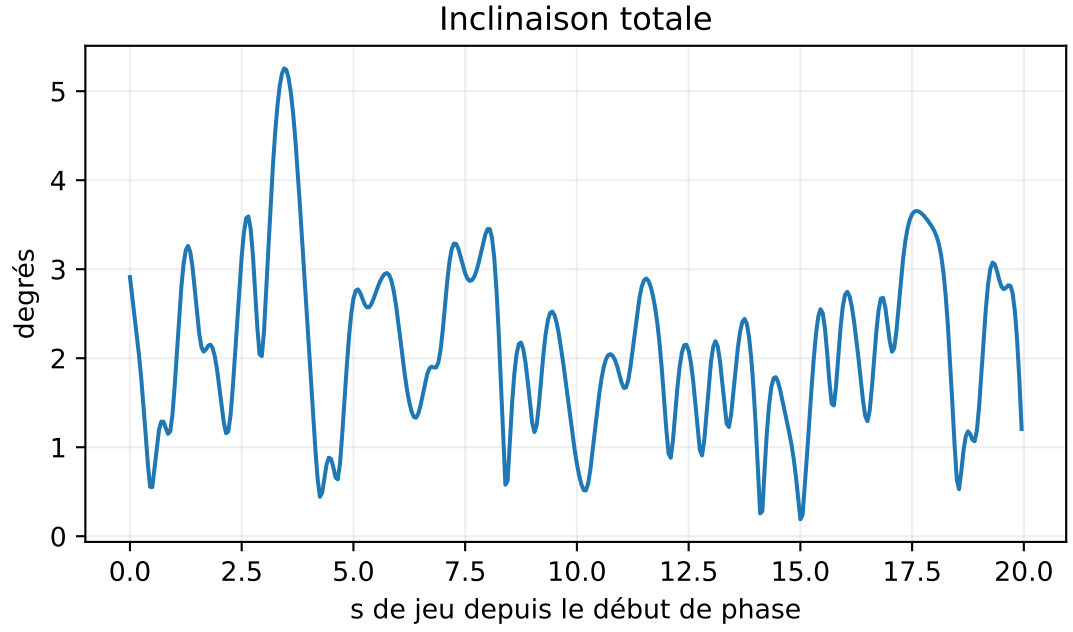

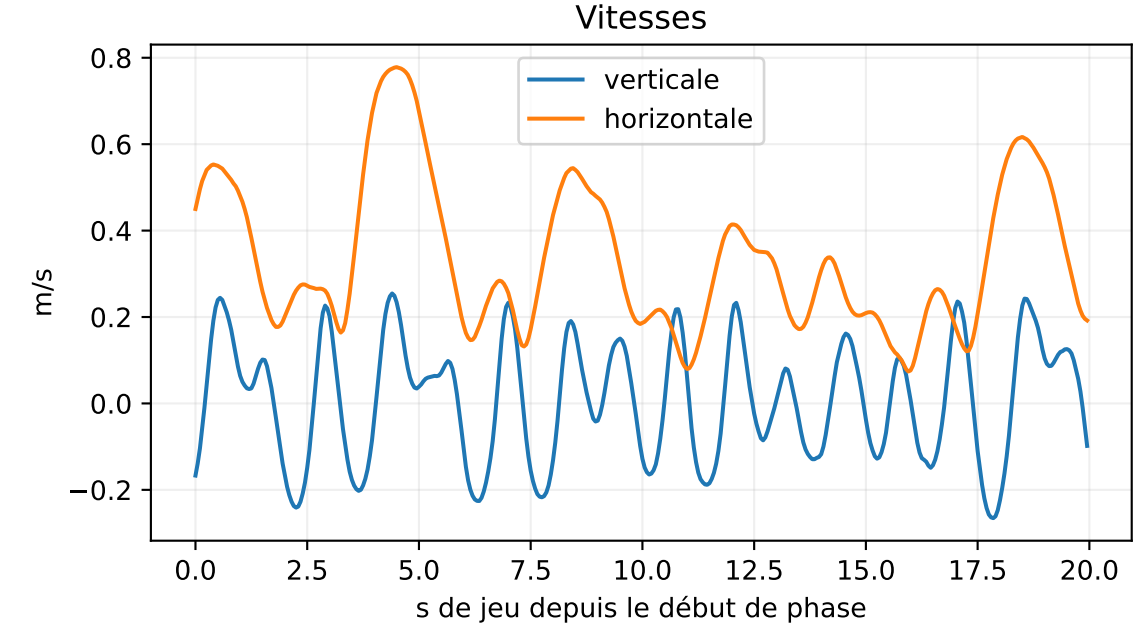

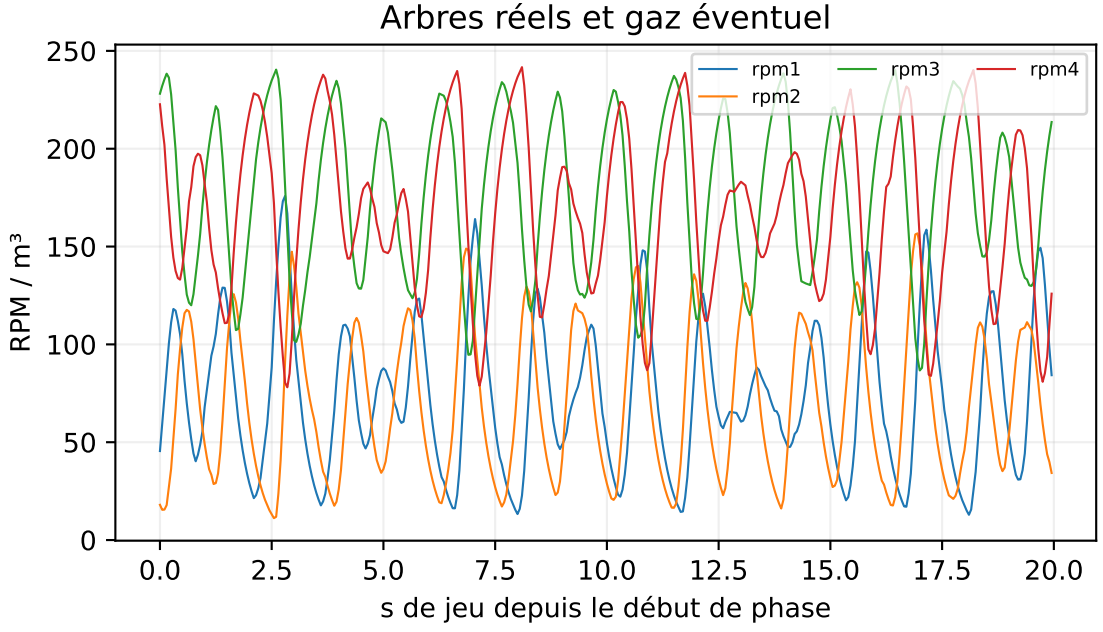

Construction native, vérification mécanique avant armement ; charge et géométrie propres à ce modèle. Qualification globale : non.

quad / reverse — FAIL — Minecraft réel

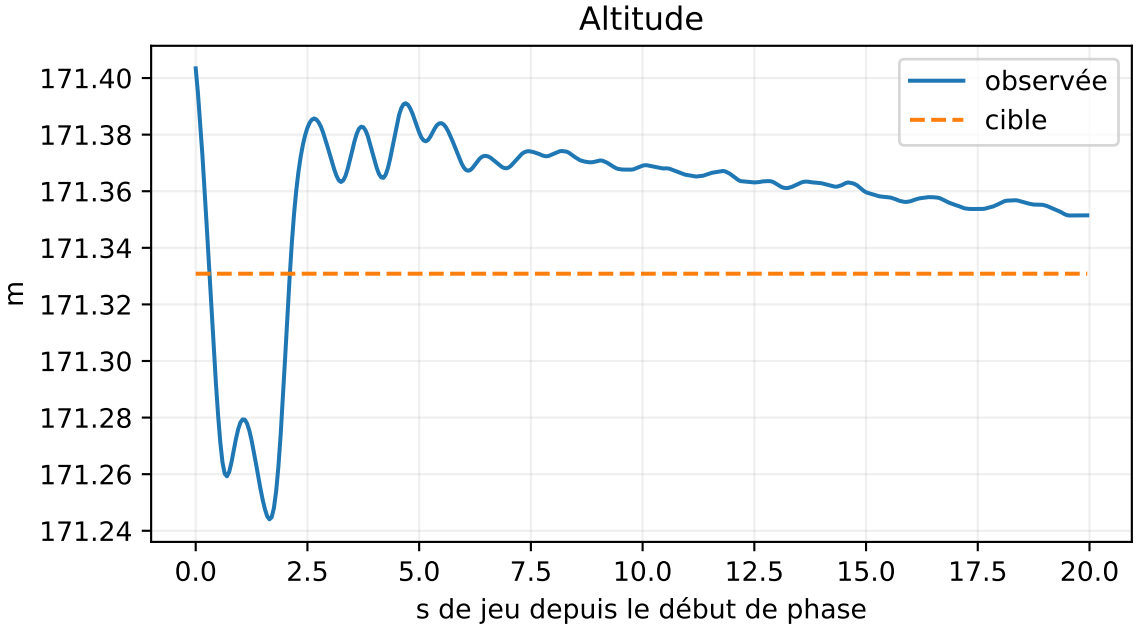

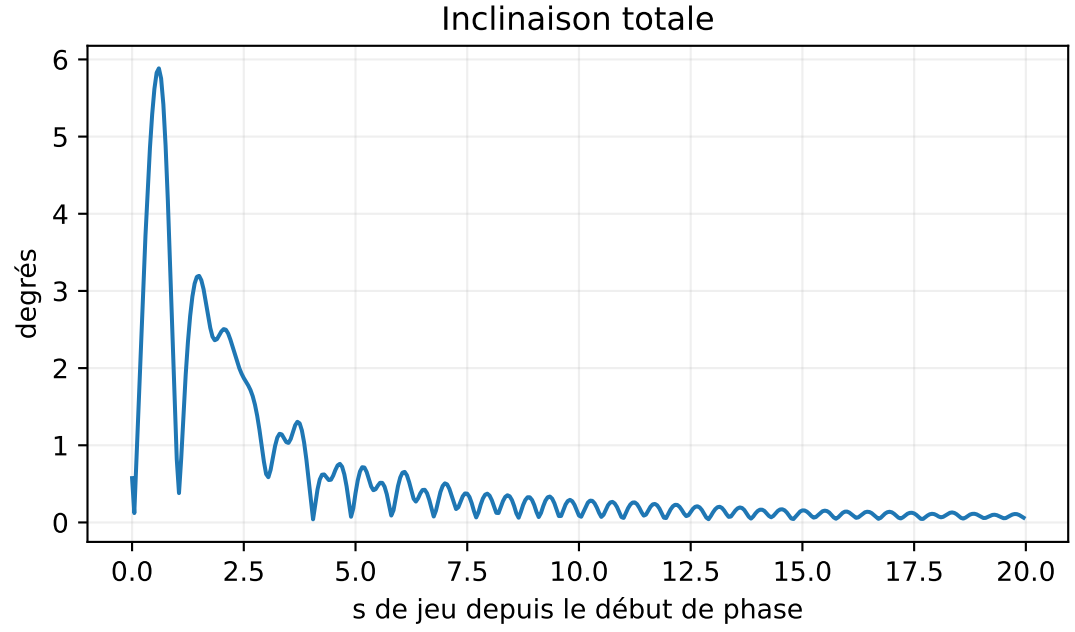

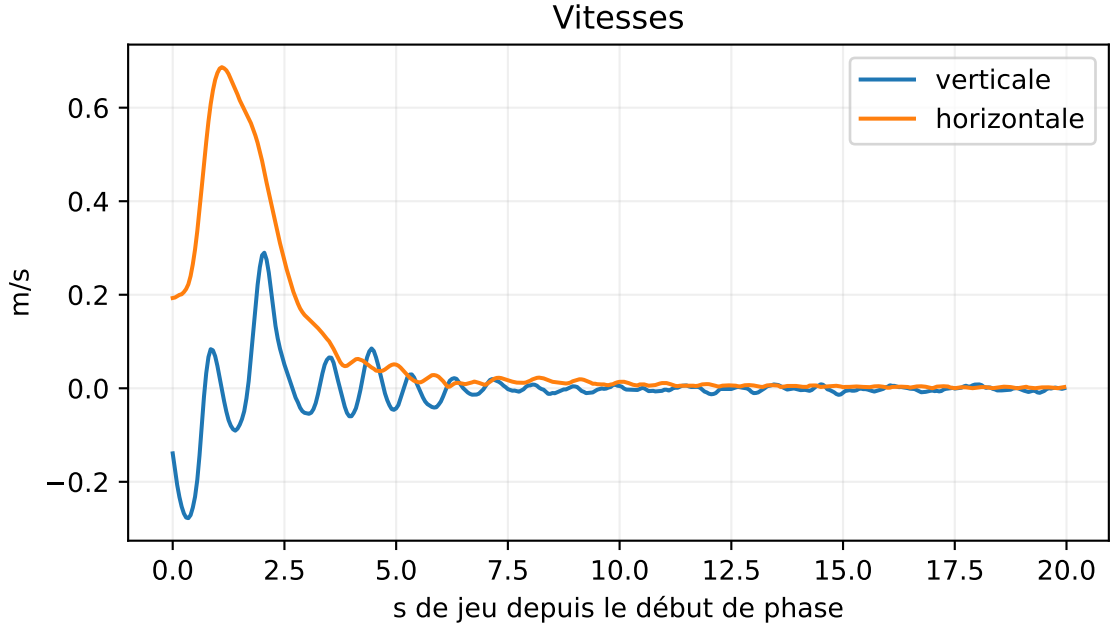

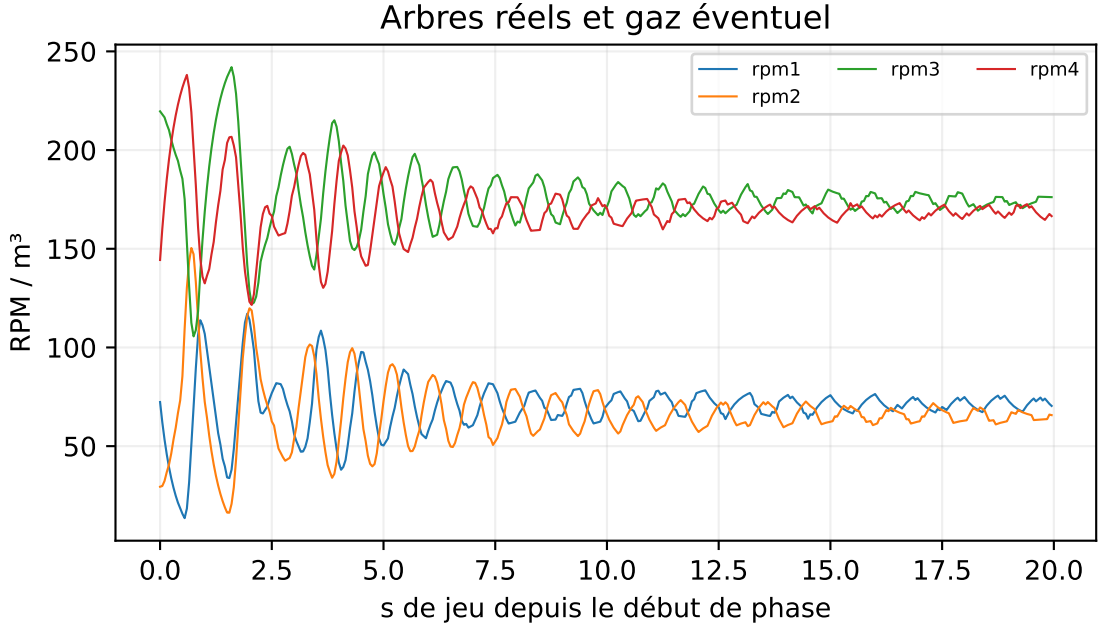

Construction native, vérification mécanique avant armement ; charge et géométrie propres à ce modèle. Qualification globale : non.

quad / left — FAIL — Minecraft réel

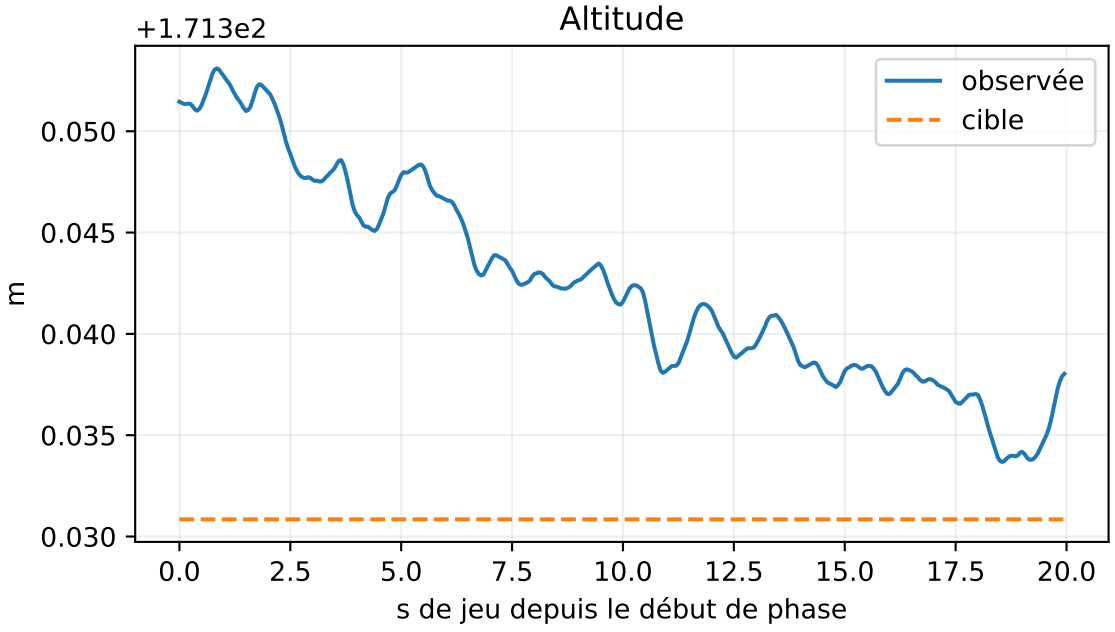

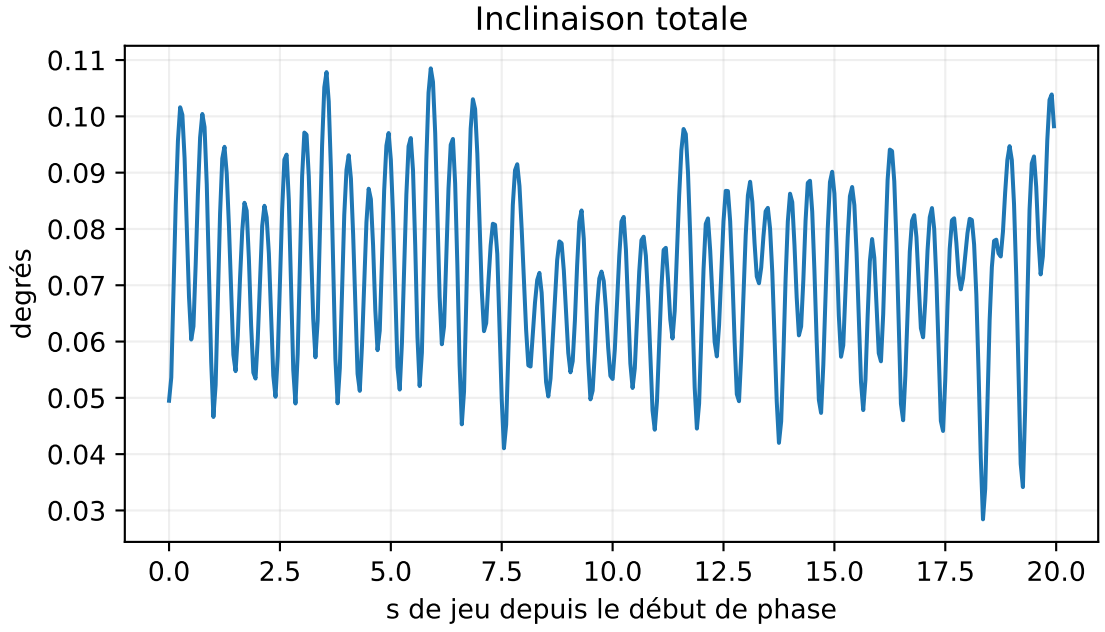

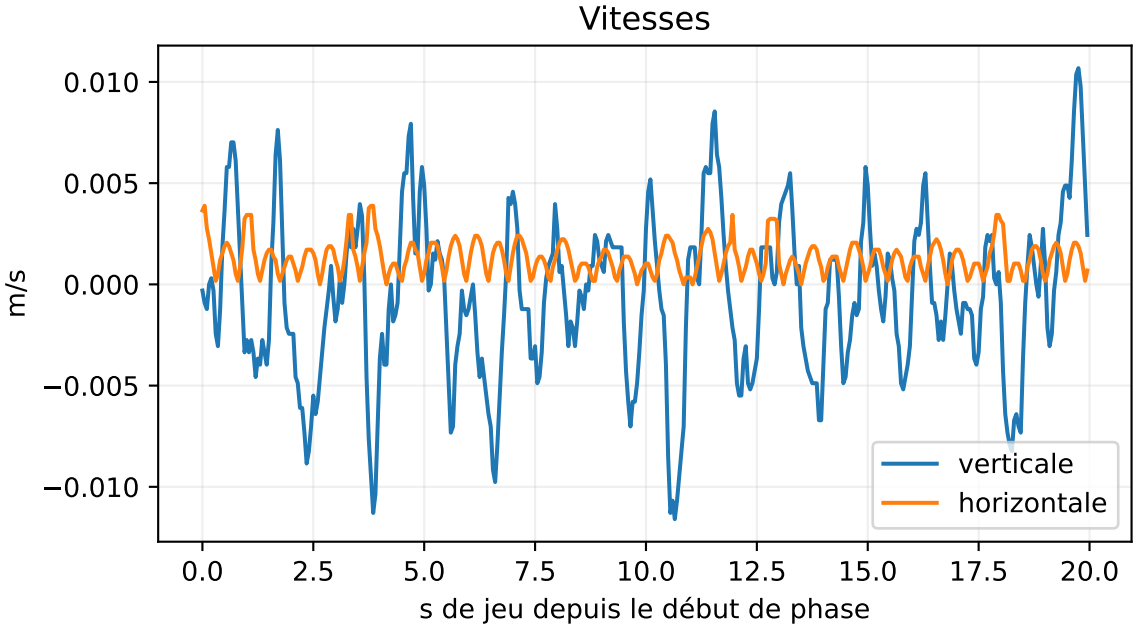

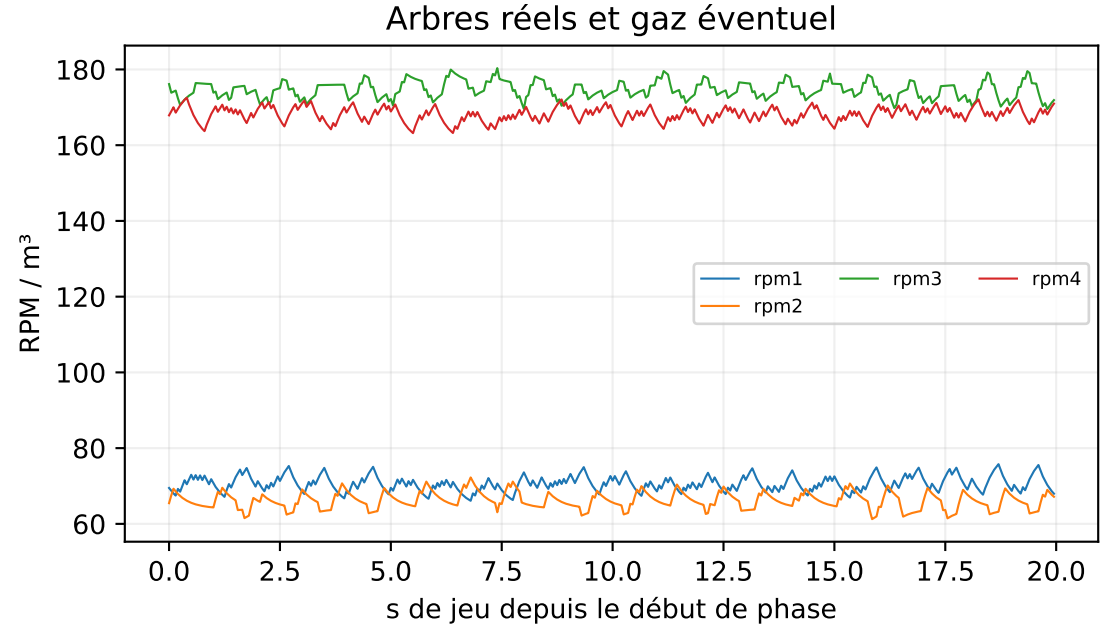

Construction native, vérification mécanique avant armement ; charge et géométrie propres à ce modèle. Qualification globale : non.

quad / right — FAIL — Minecraft réel

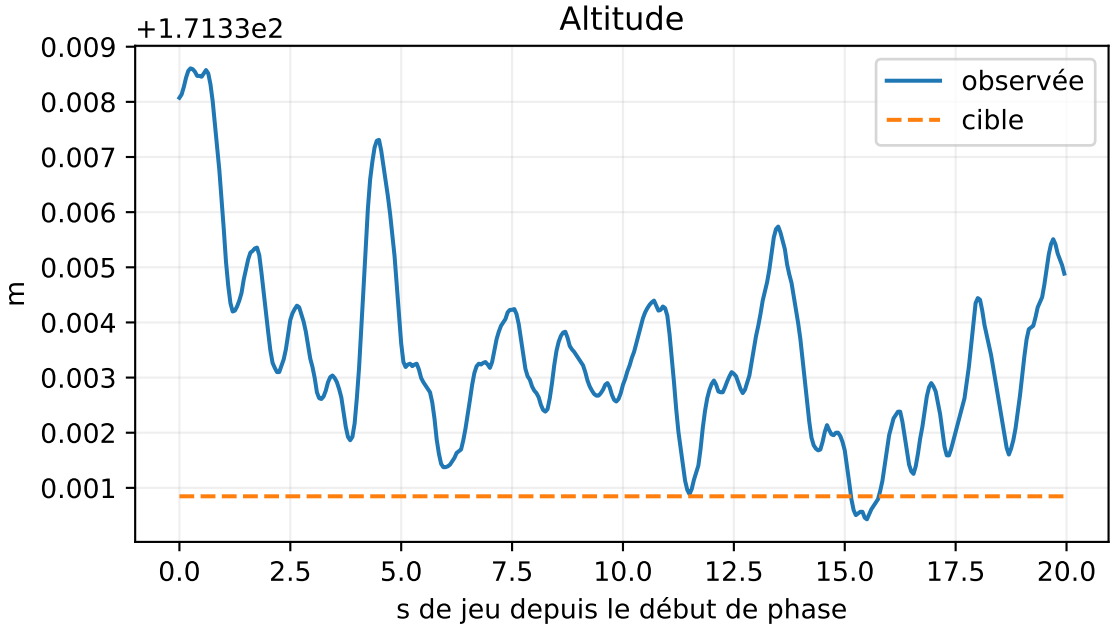

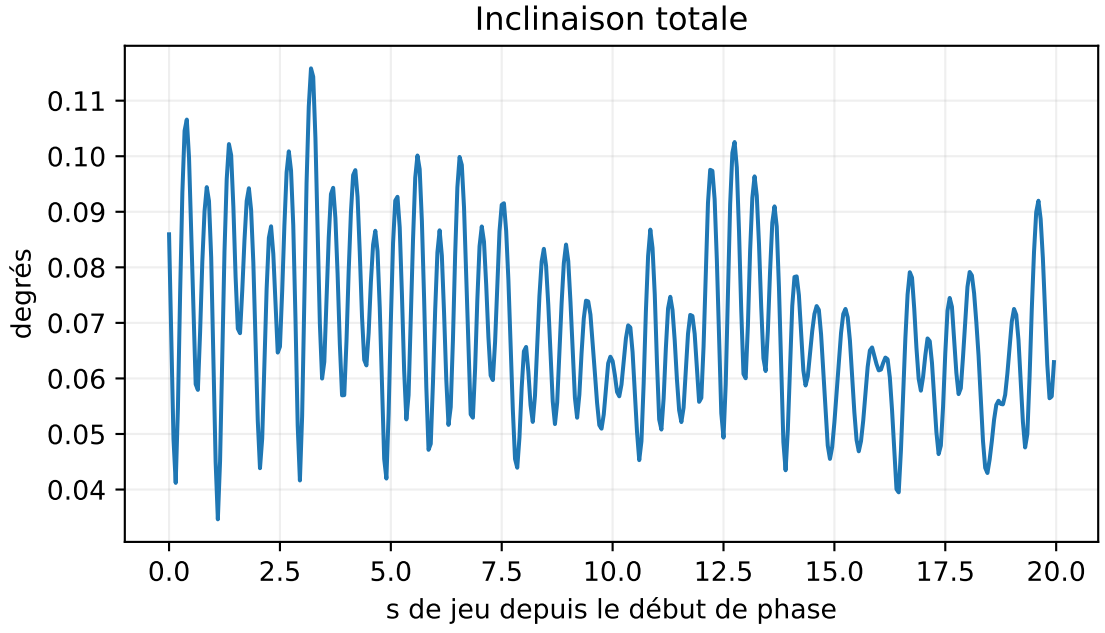

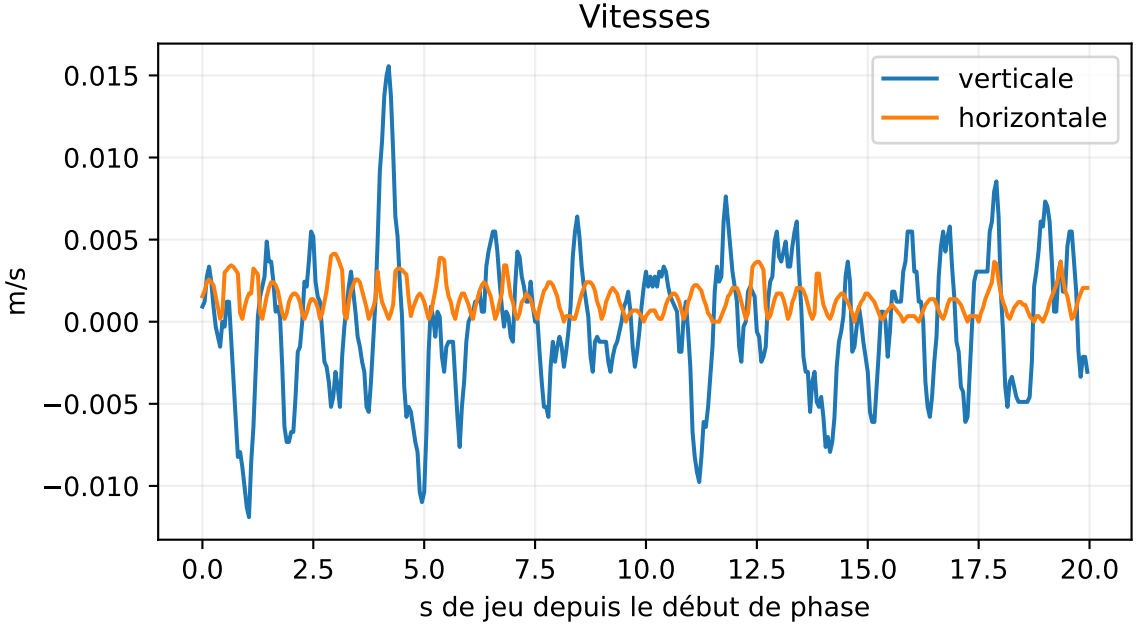

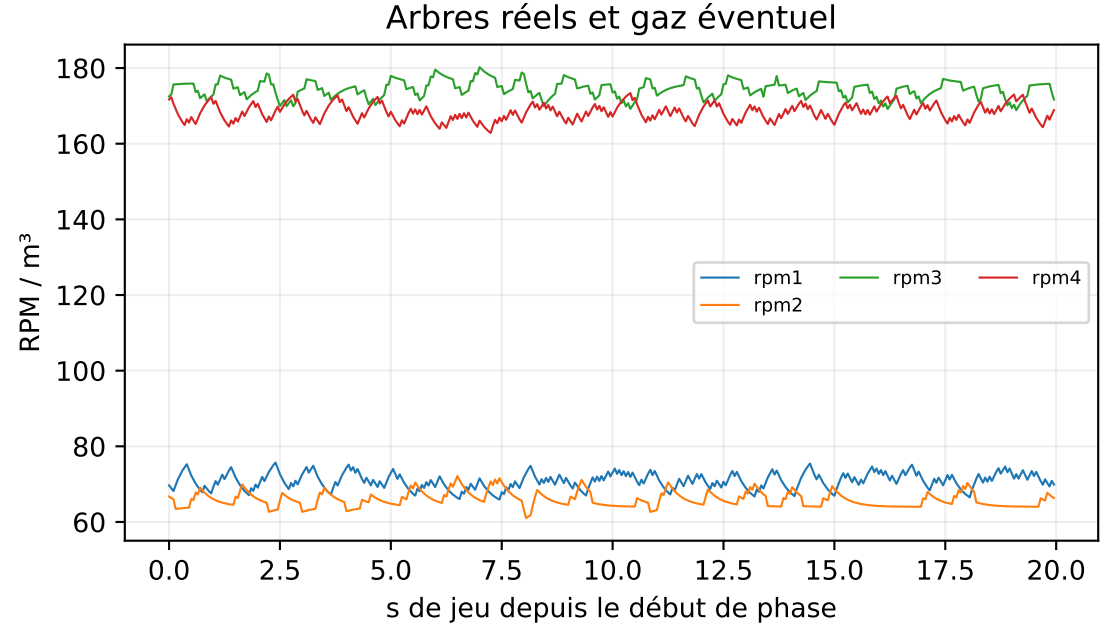

Construction native, vérification mécanique avant armement ; charge et géométrie propres à ce modèle. Qualification globale : non.

quad / diagonal — FAIL — Minecraft réel

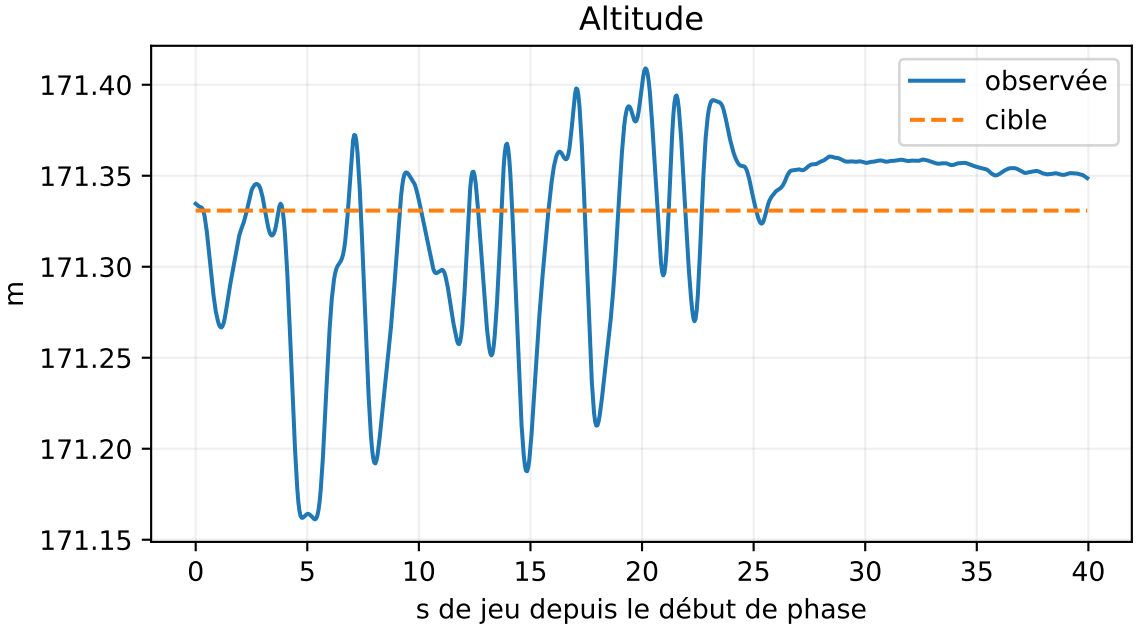

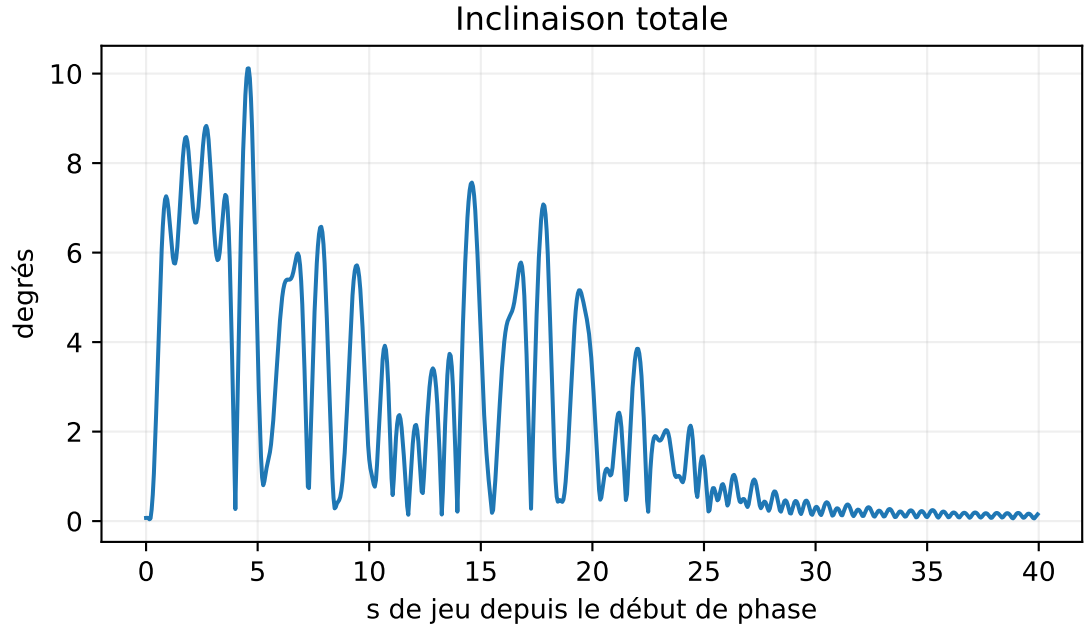

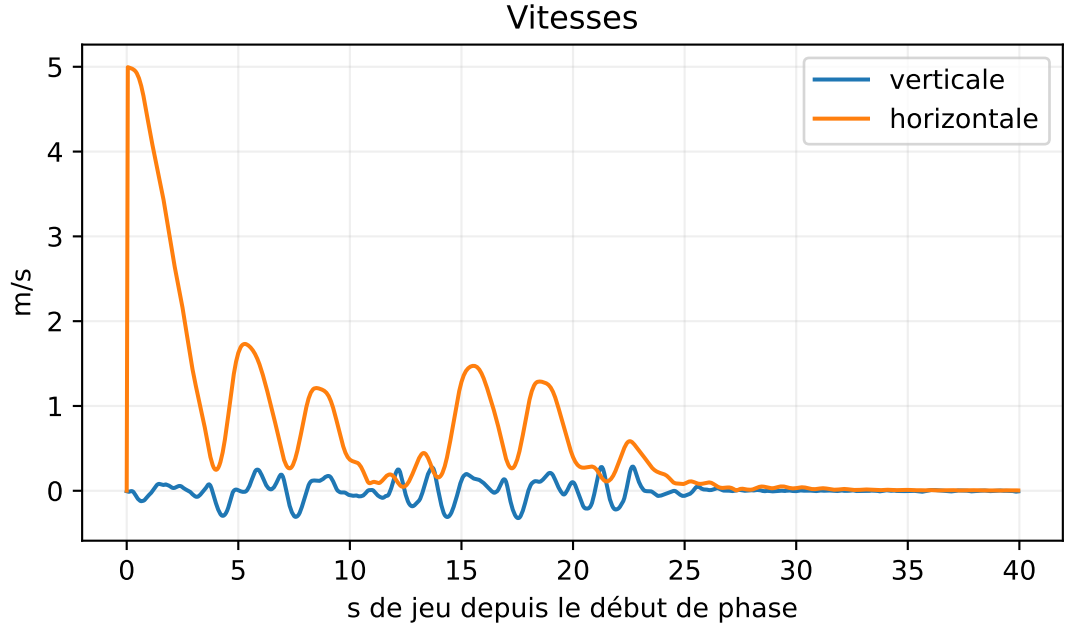

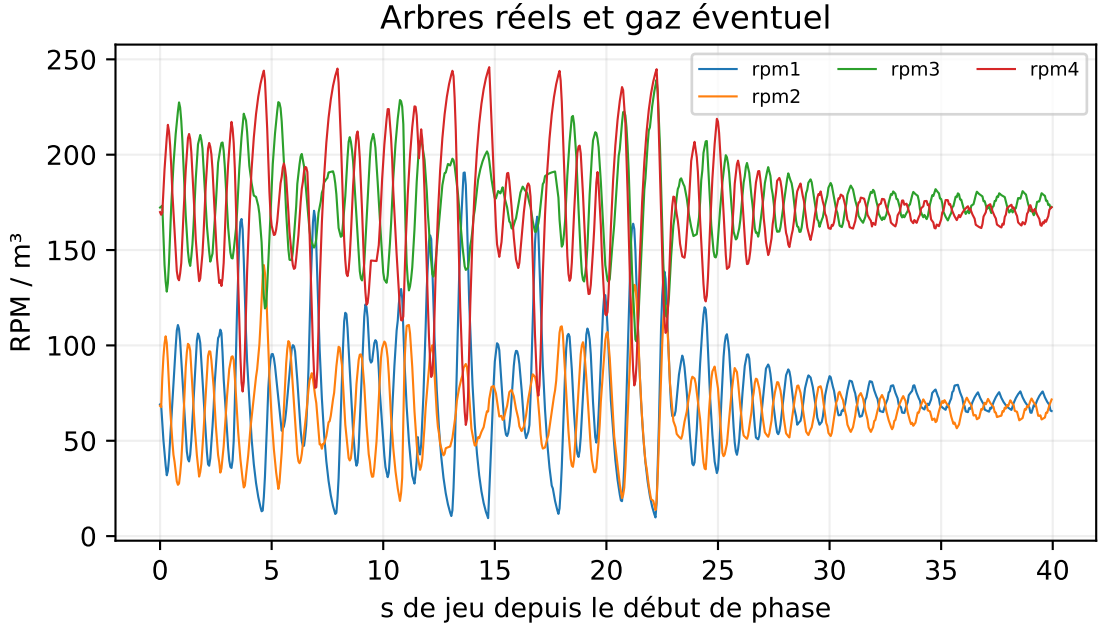

Construction native, vérification mécanique avant armement ; charge et géométrie propres à ce modèle. Qualification globale : non.

quad / shock — PROTECTED — Minecraft réel

Construction native, vérification mécanique avant armement ; charge et géométrie propres à ce modèle. Qualification globale : non.
