reference / baseline / hover — PASS

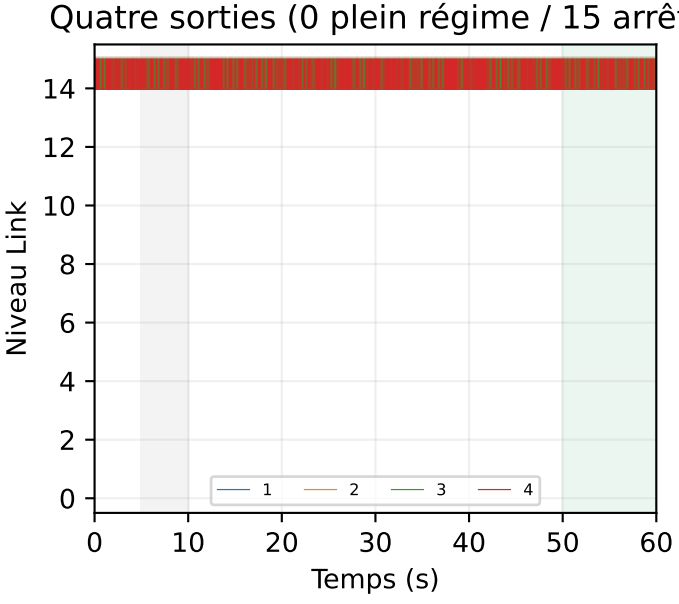

Maintien sans touche pendant toute la simulation.

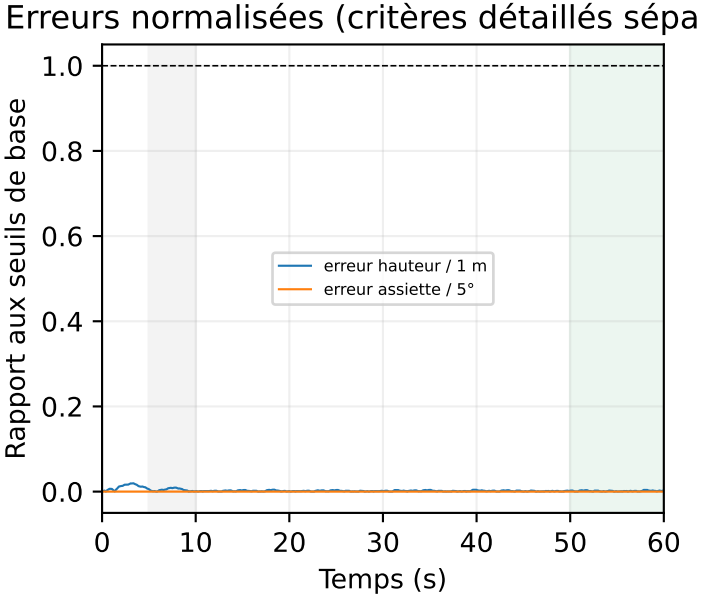

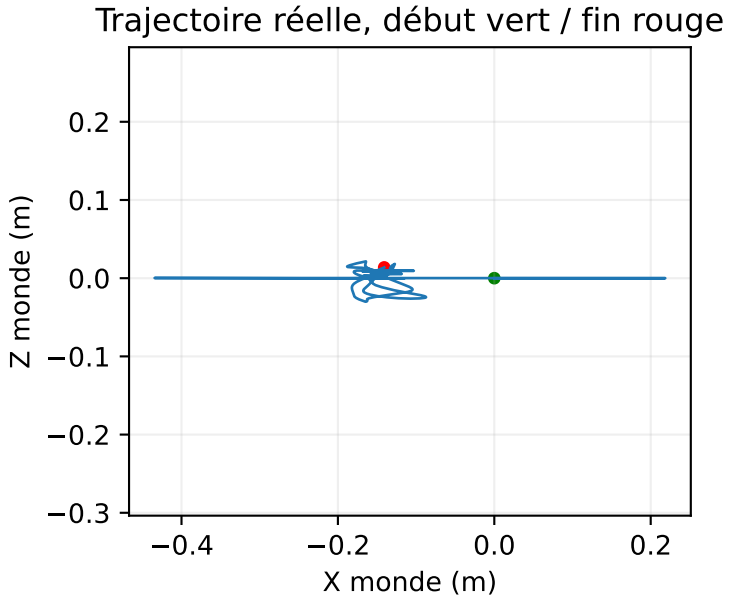

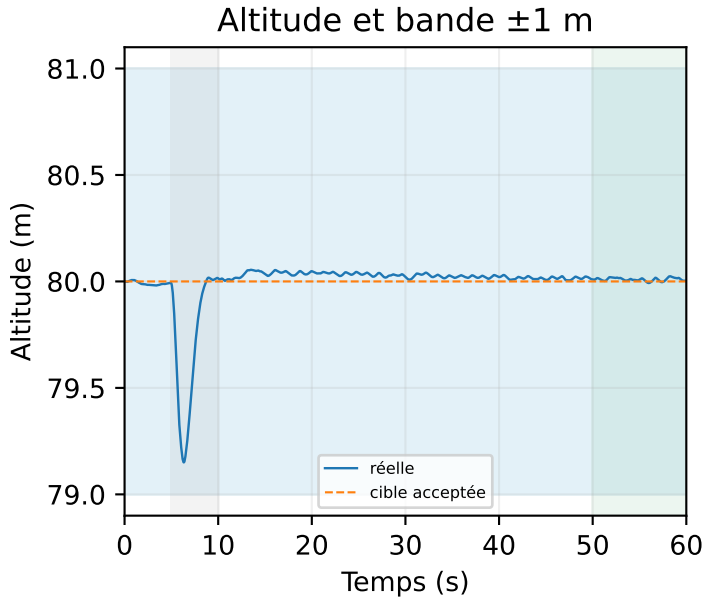

Erreur finale hauteur 0.002 m ; excursion finale 0.008 m ; assiette finale max 0.000° ; freinage — s. Critères échoués : aucun.

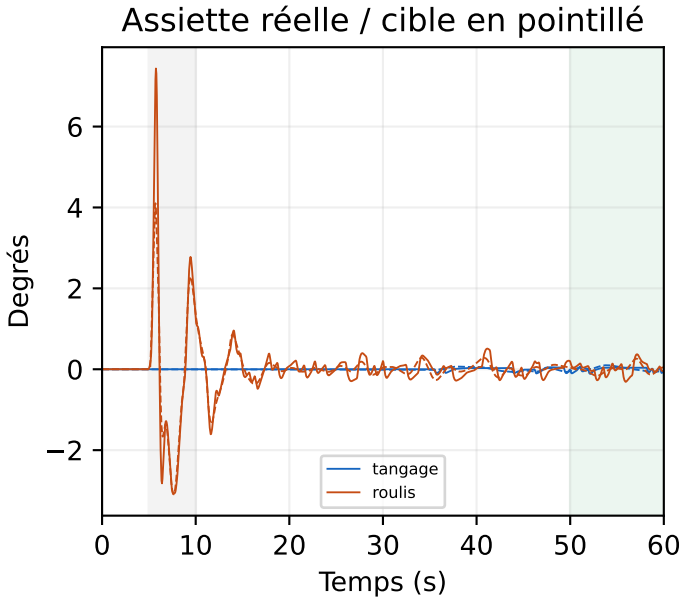

Gris : commande principale. Vert : fenêtre finale de stabilité. Modèle synthétique ; aucune qualification Minecraft.

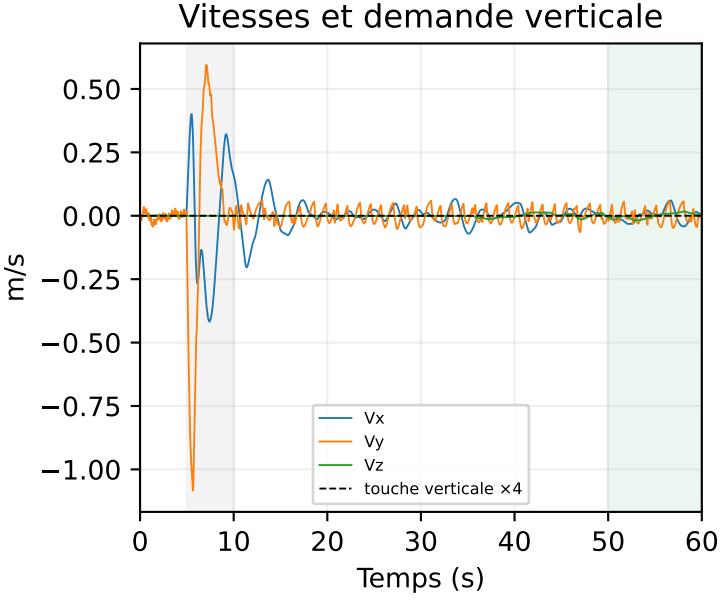

reference / baseline / load-swing — PASS

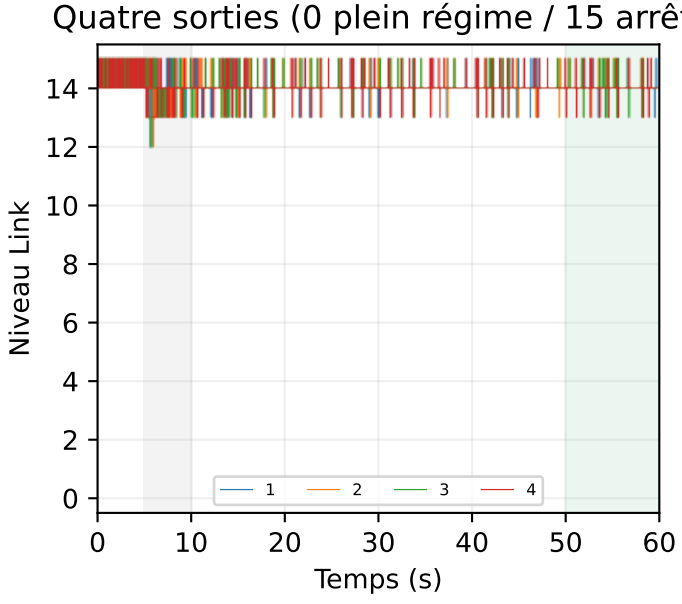

Aucune touche ; charge ponctuelle de 12 kg sur corde 5 m, inclinée initialement de 20°, ajoutée à 5 s.

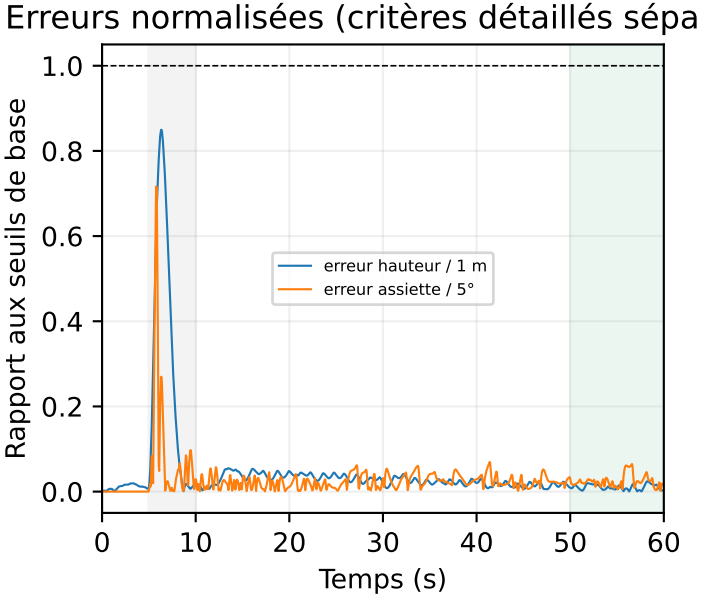

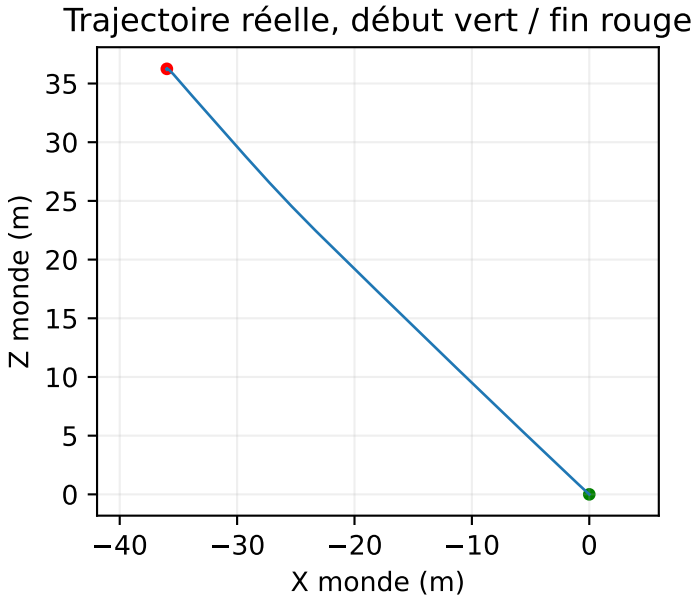

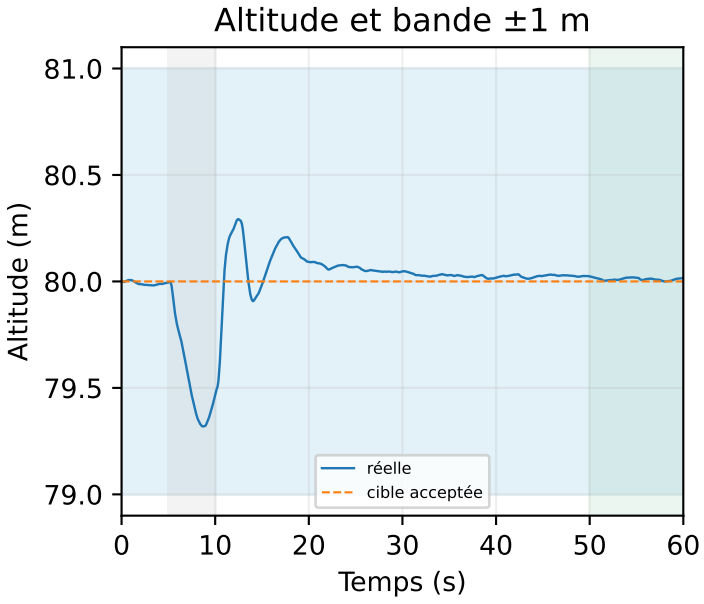

Erreur finale hauteur 0.004 m ; excursion finale 0.032 m ; assiette finale max 0.374° ; freinage — s. Critères échoués : aucun.

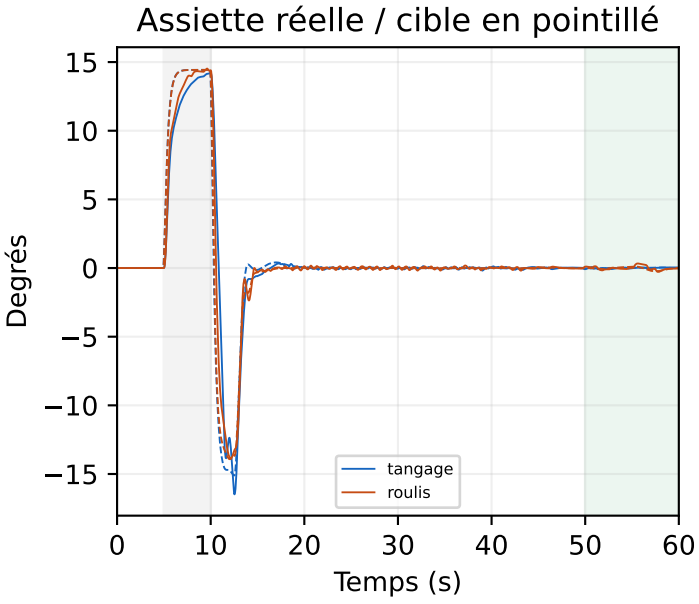

Gris : commande principale. Vert : fenêtre finale de stabilité. Modèle synthétique ; aucune qualification Minecraft.

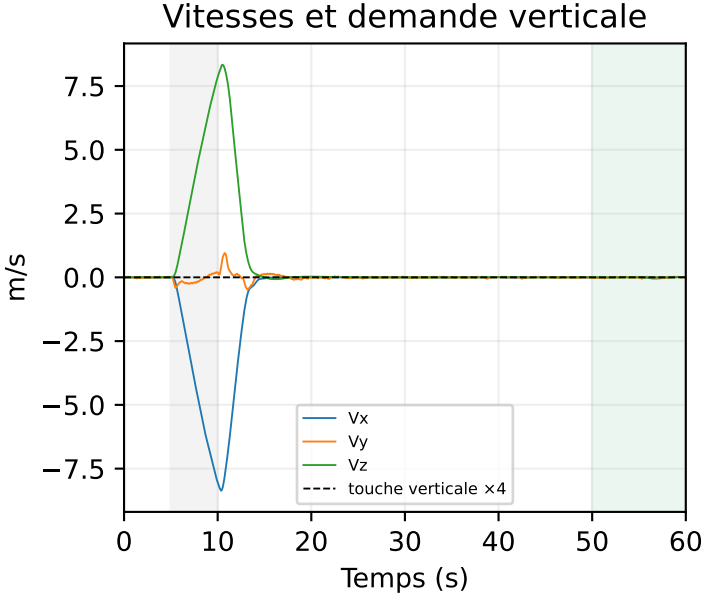

reference / baseline / forward-left — PASS

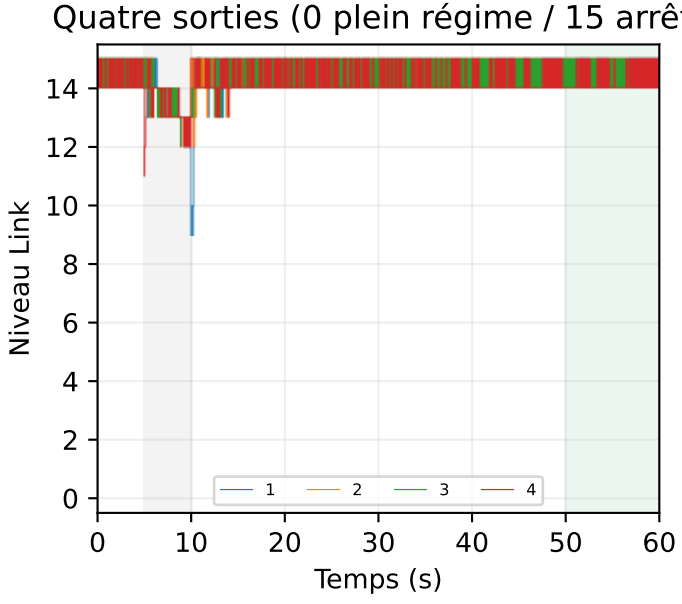

W+Q entre 5 et 10 s, mode déplacement latéral.

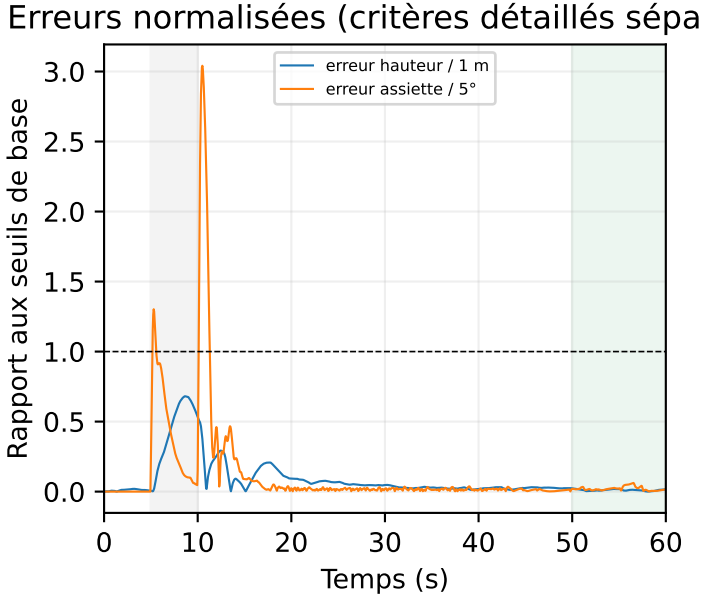

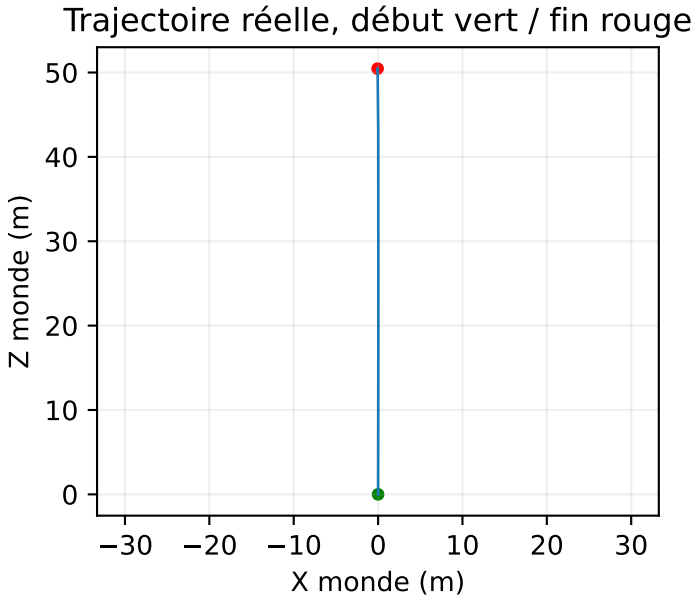

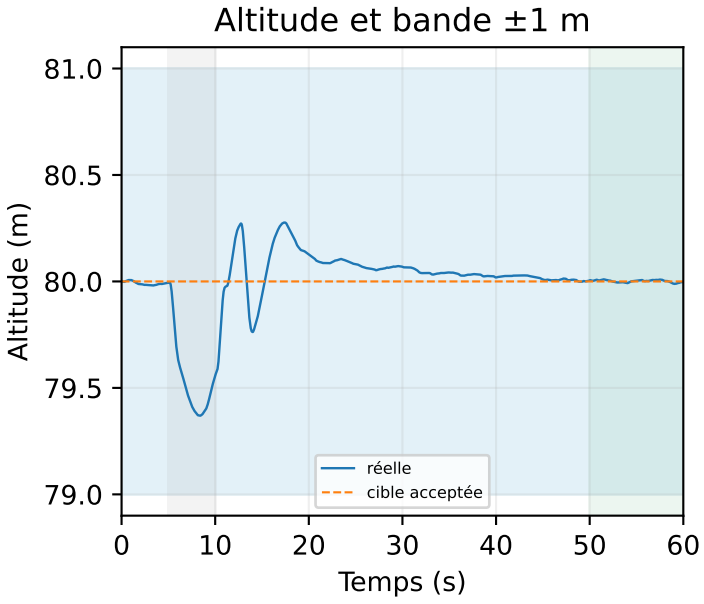

Erreur finale hauteur 0.016 m ; excursion finale 0.024 m ; assiette finale max 0.334° ; freinage 4.700 s. Critères échoués : aucun.

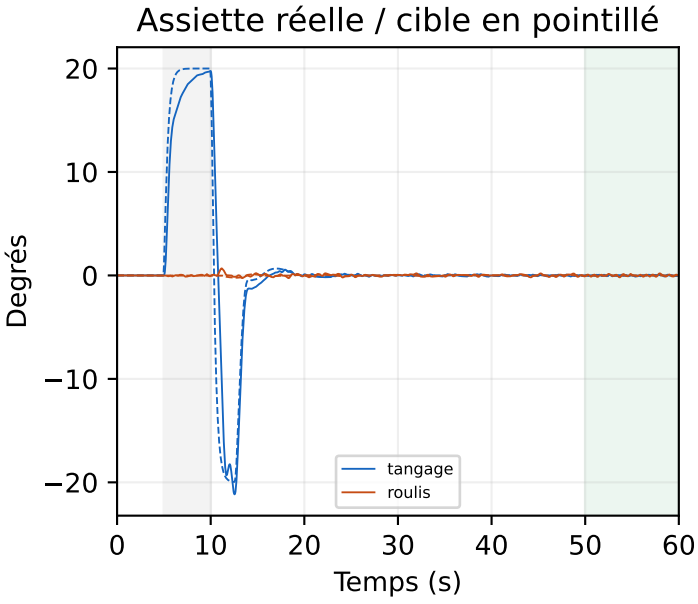

Gris : commande principale. Vert : fenêtre finale de stabilité. Modèle synthétique ; aucune qualification Minecraft.

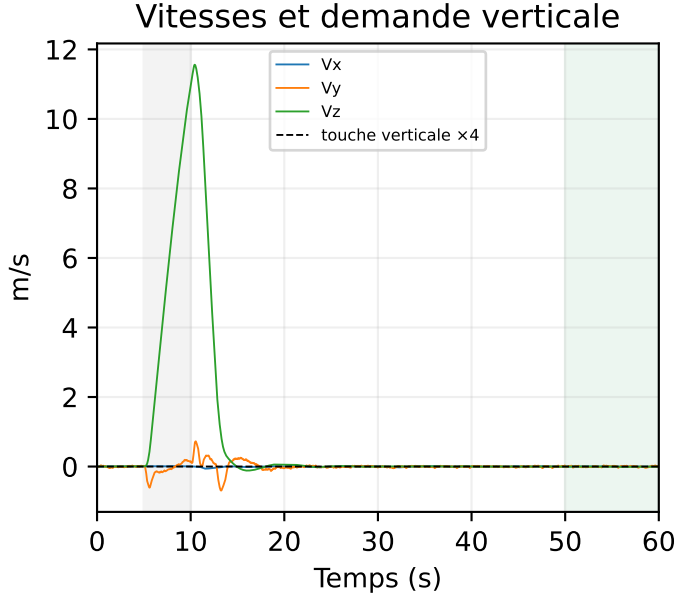

reference / baseline / brake — PASS

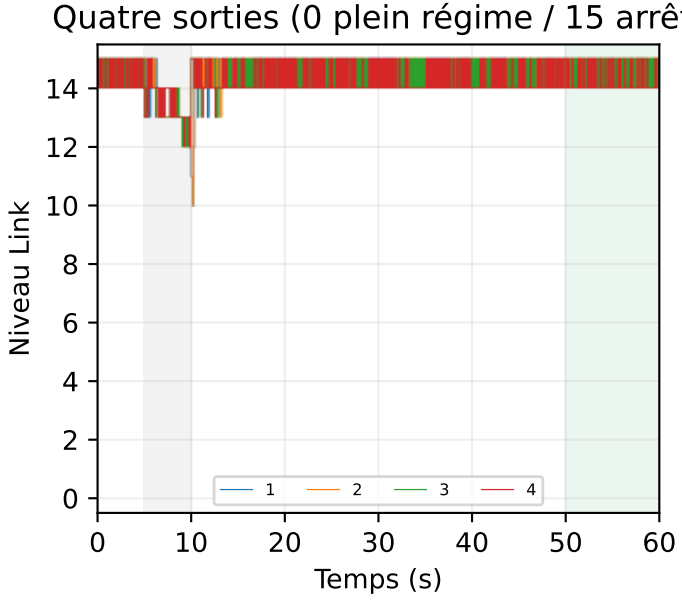

W de 5 à 10 s, relâchement, délai de freinage mesuré sur 15 observations consécutives.

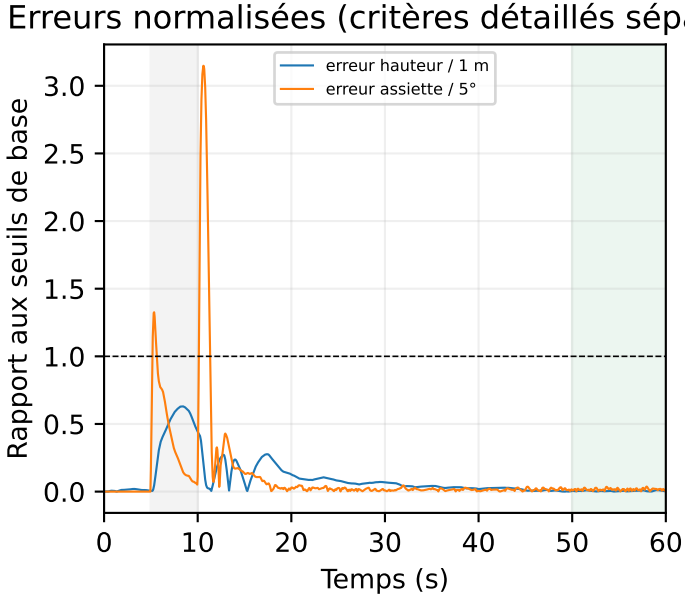

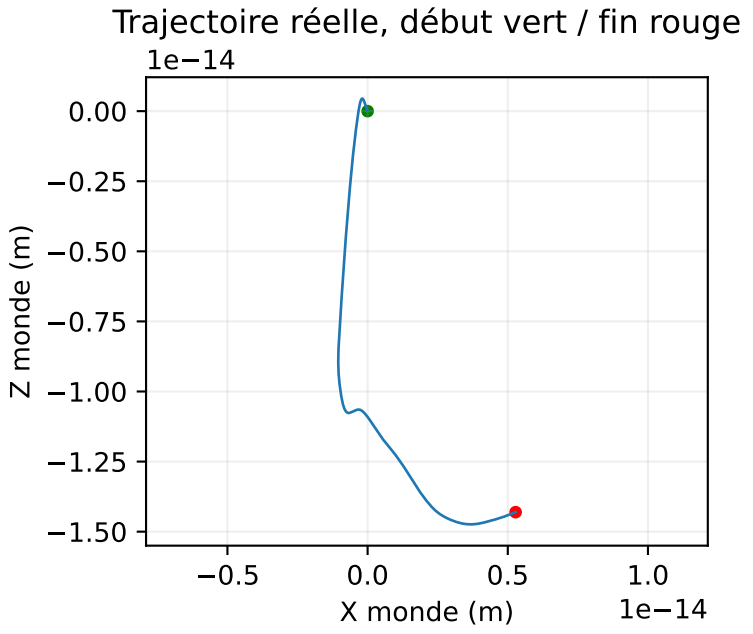

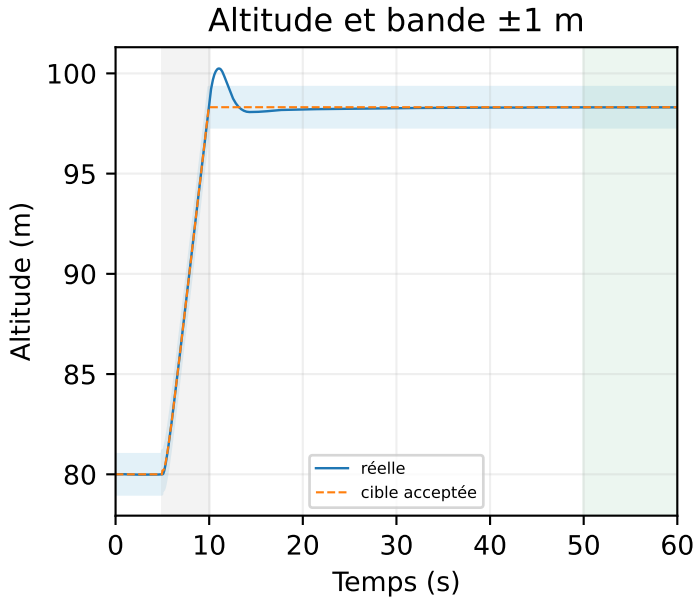

Erreur finale hauteur 0.003 m ; excursion finale 0.021 m ; assiette finale max 0.206° ; freinage 4.550 s. Critères échoués : aucun.

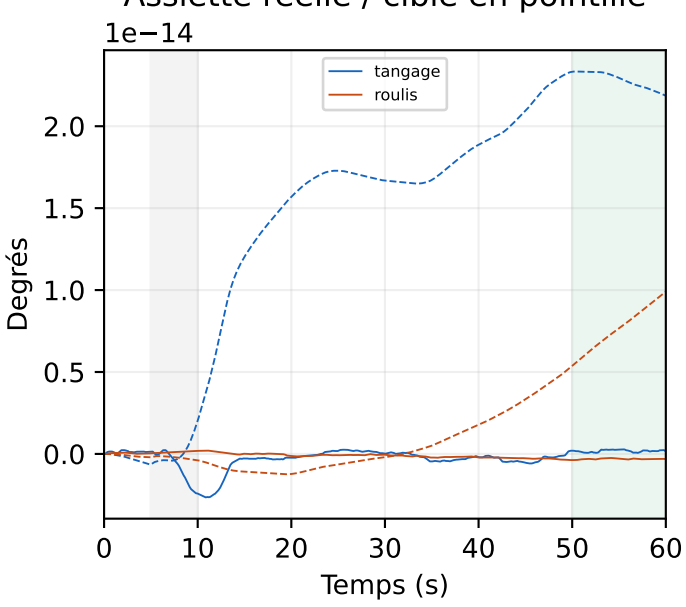

Gris : commande principale. Vert : fenêtre finale de stabilité. Modèle synthétique ; aucune qualification Minecraft.

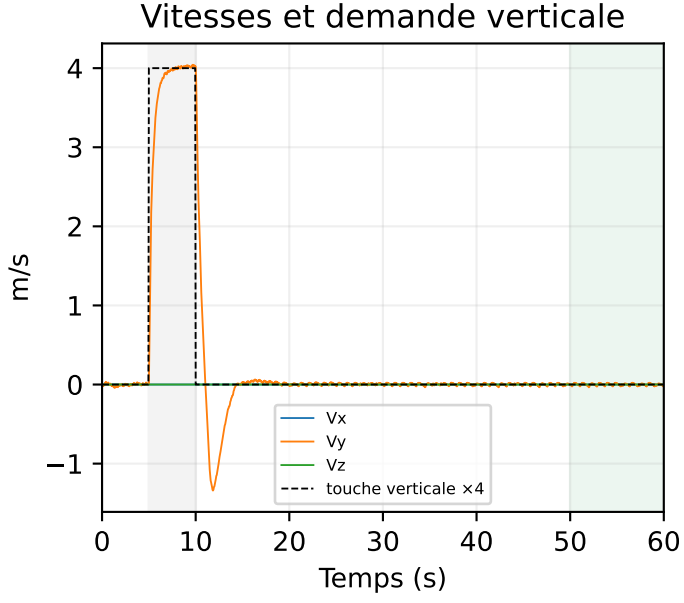

reference / baseline / climb — PASS

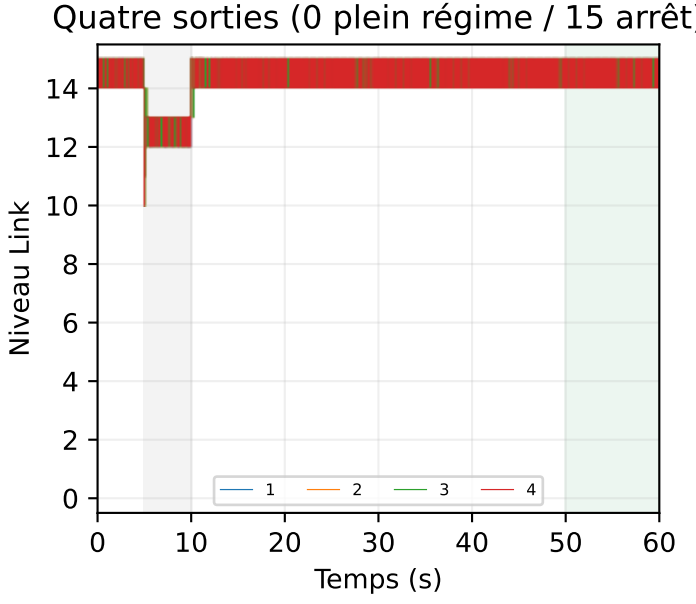

Espace entre 5 et 10 s, puis relâchement et maintien de la hauteur atteinte.

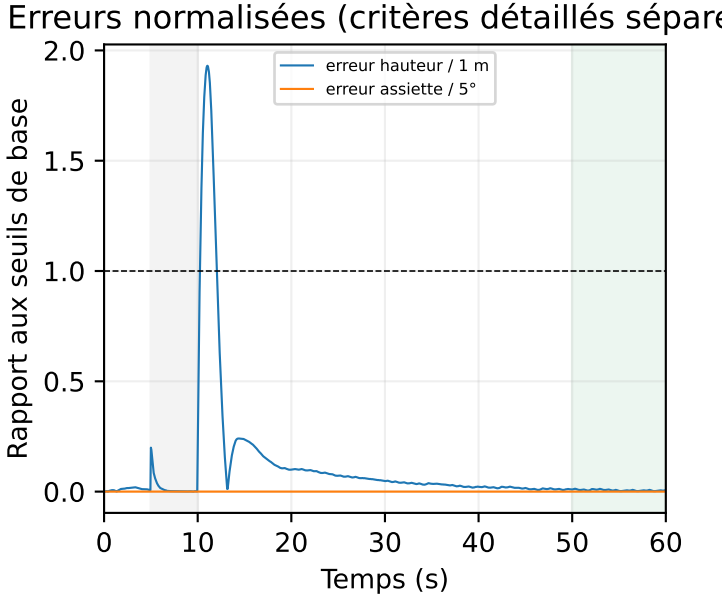

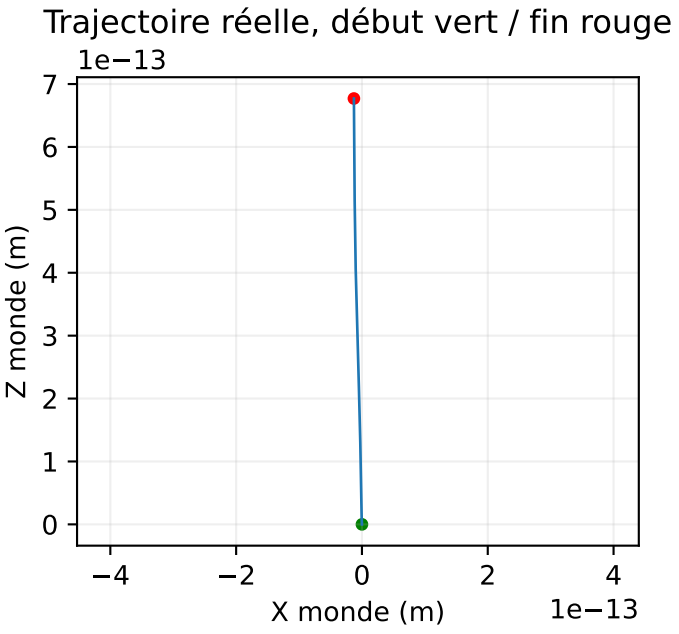

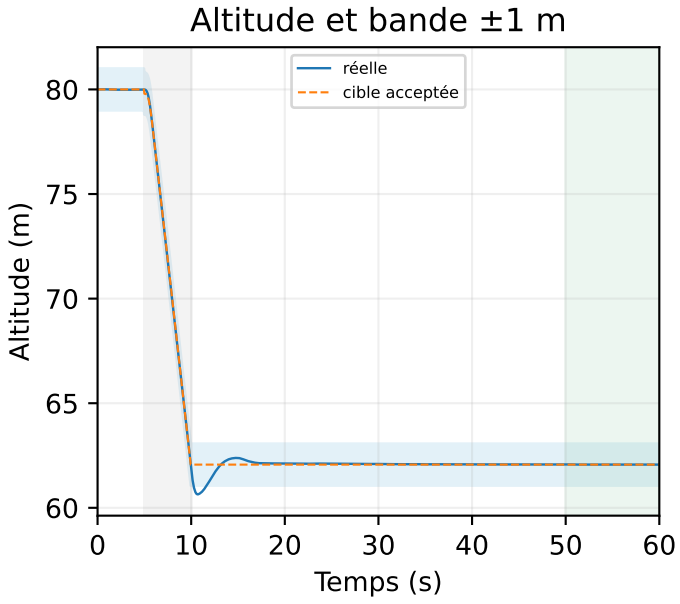

Erreur finale hauteur 0.007 m ; excursion finale 0.011 m ; assiette finale max 0.000° ; freinage — s. Critères échoués : aucun.

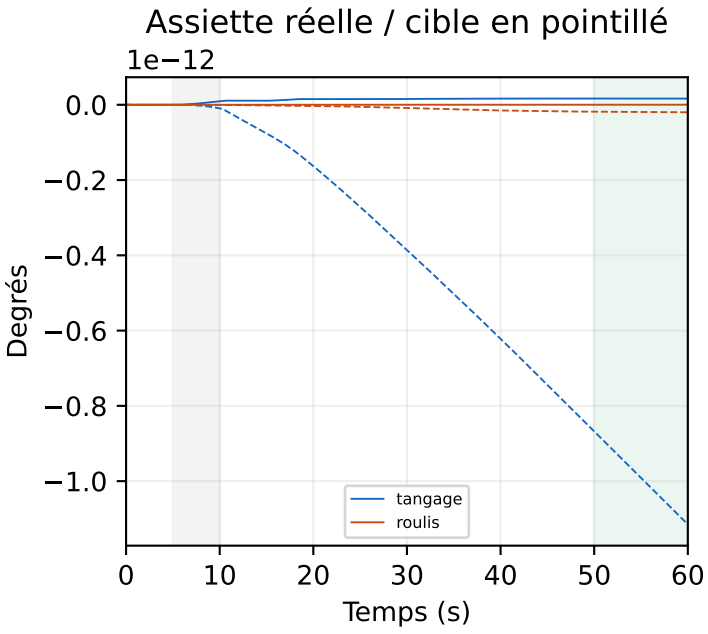

Gris : commande principale. Vert : fenêtre finale de stabilité. Modèle synthétique ; aucune qualification Minecraft.

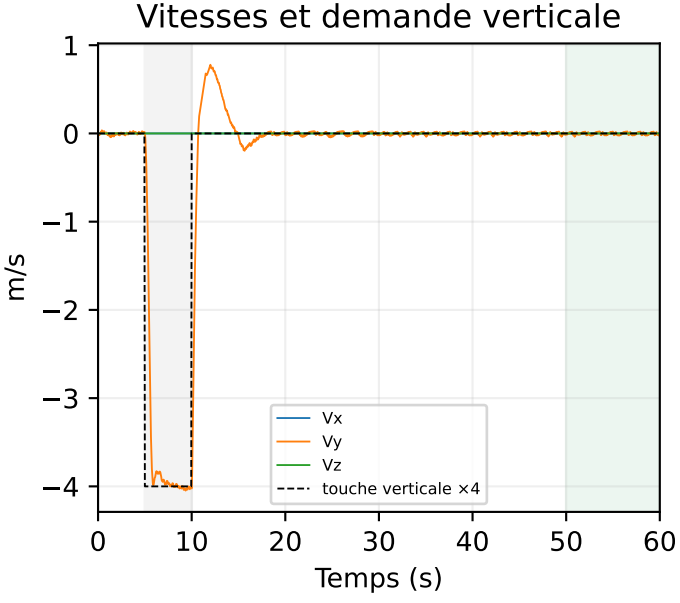

reference / baseline / descend — PASS

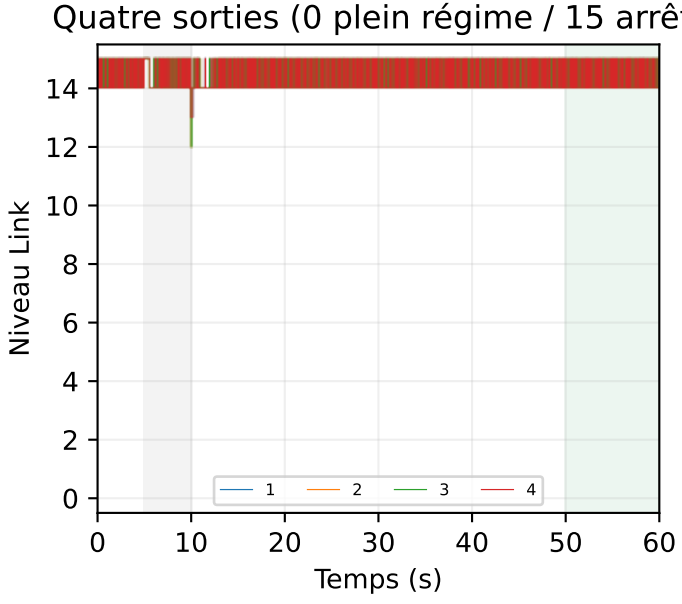

Shift entre 5 et 10 s, puis relâchement et maintien.

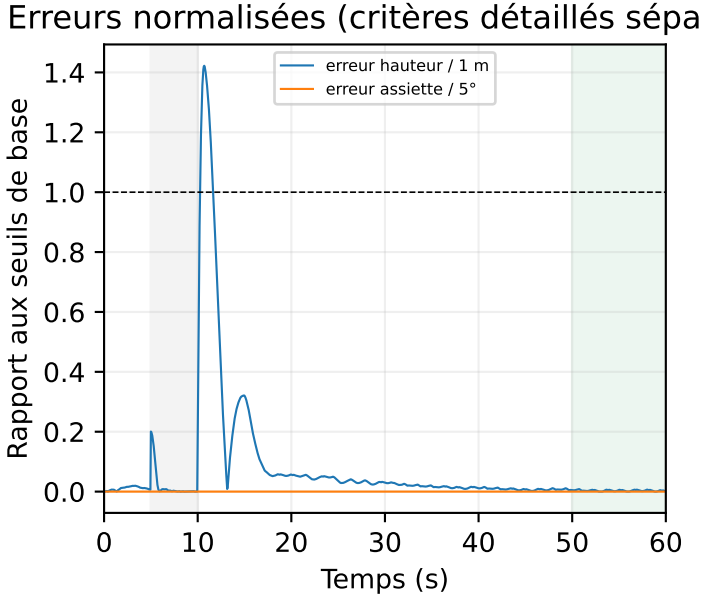

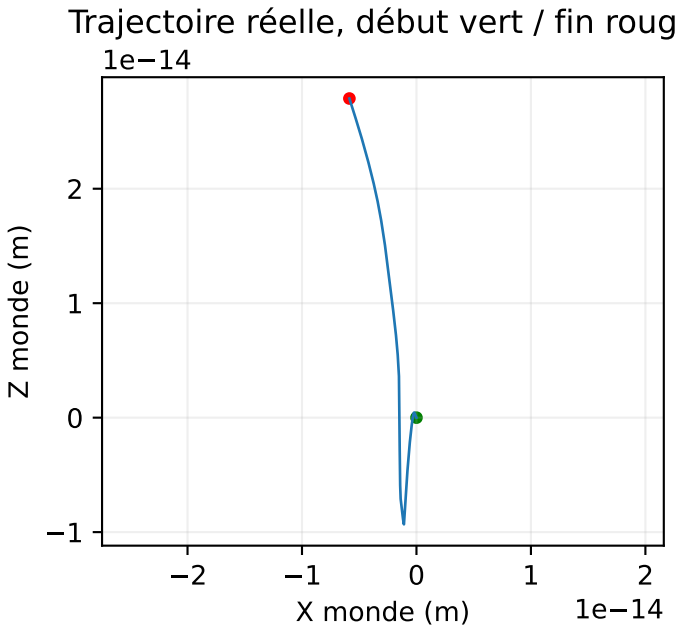

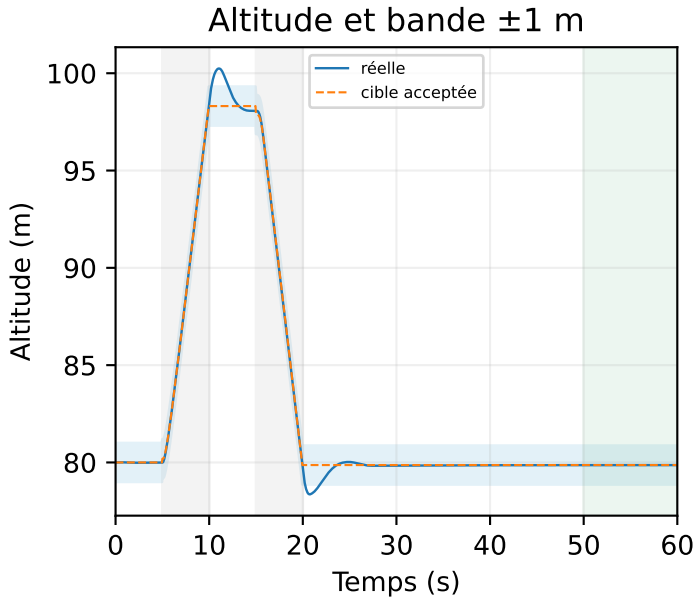

Erreur finale hauteur 0.001 m ; excursion finale 0.010 m ; assiette finale max 0.000° ; freinage — s. Critères échoués : aucun.

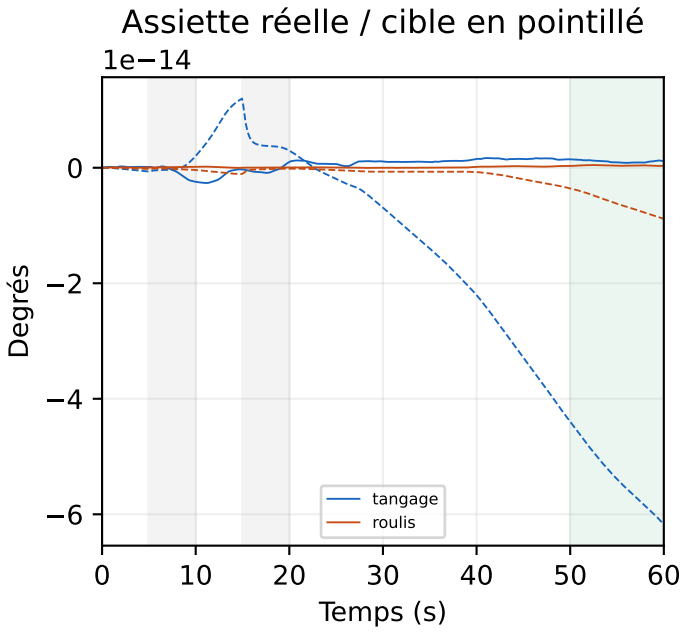

Gris : commande principale. Vert : fenêtre finale de stabilité. Modèle synthétique ; aucune qualification Minecraft.

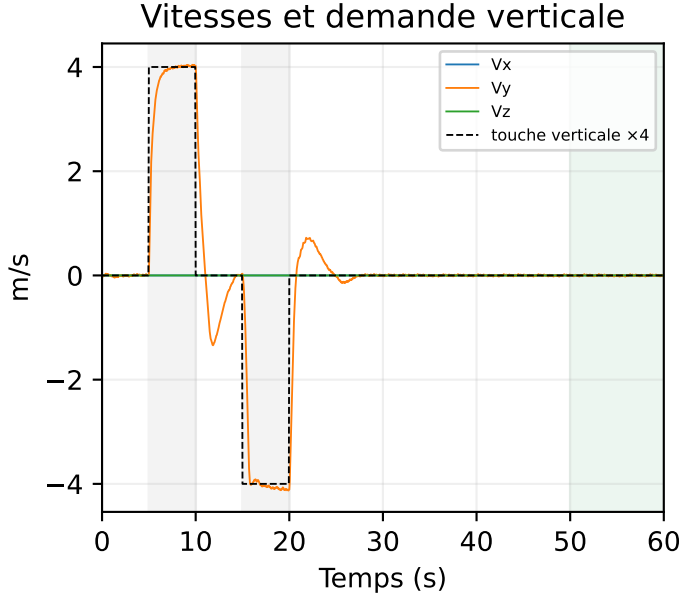

reference / baseline / vertical-cycle — PASS

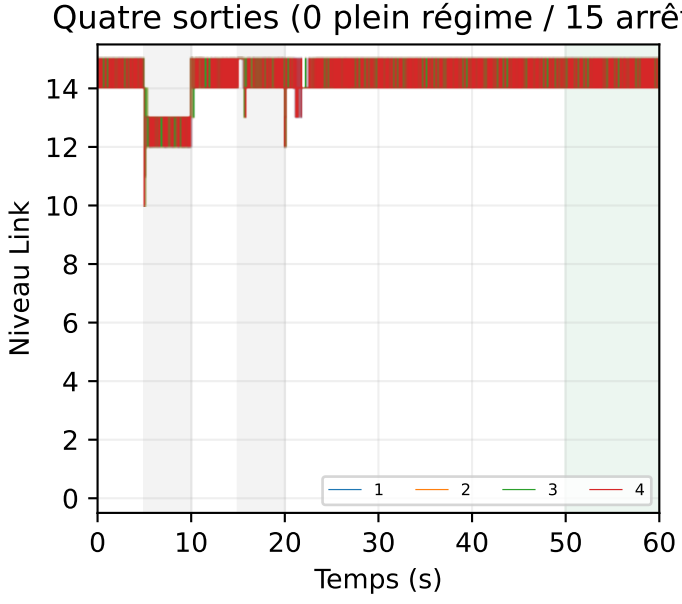

Espace de 5 à 10 s, maintien 10–15 s, Shift 15–20 s, puis maintien.

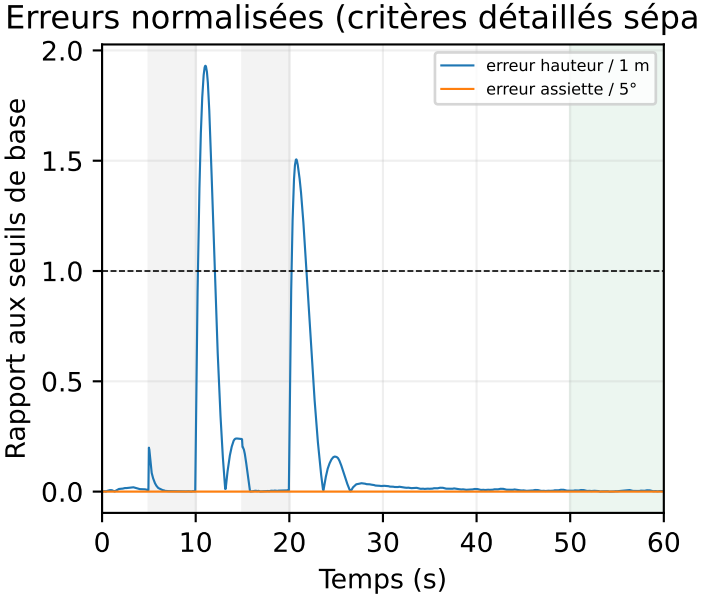

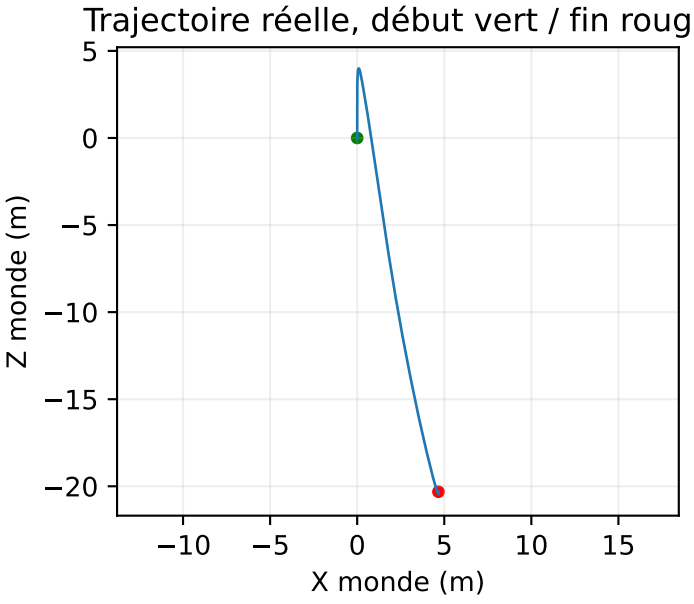

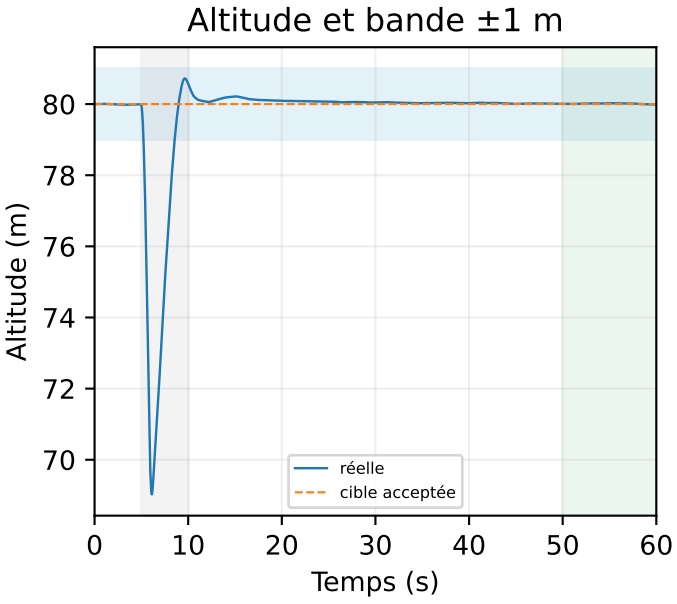

Erreur finale hauteur 0.002 m ; excursion finale 0.009 m ; assiette finale max 0.000° ; freinage — s. Critères échoués : aucun.

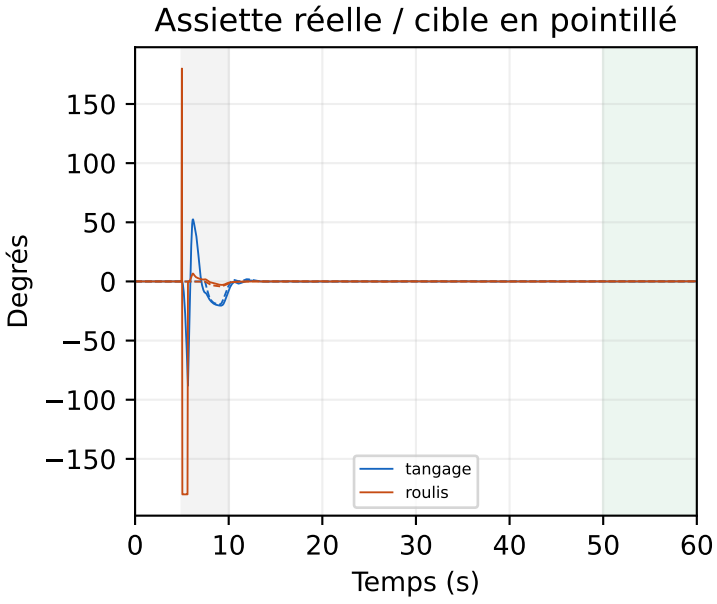

Gris : commande principale. Vert : fenêtre finale de stabilité. Modèle synthétique ; aucune qualification Minecraft.

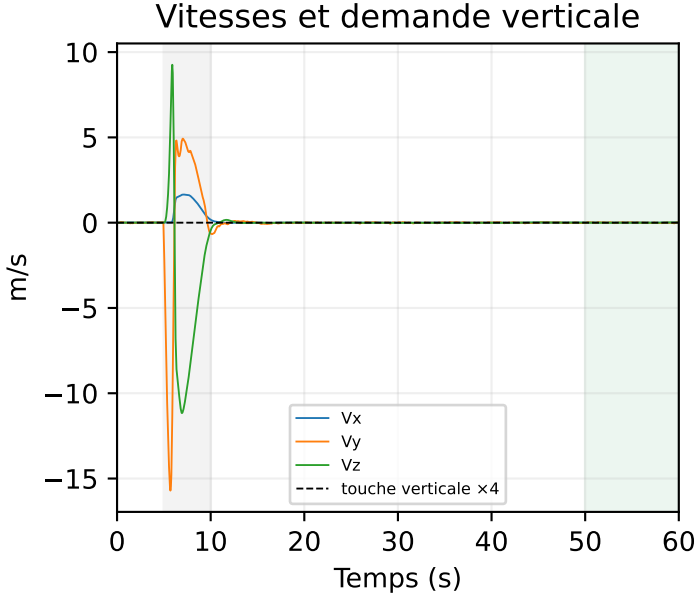

reference / baseline / recovery-inverted — PASS

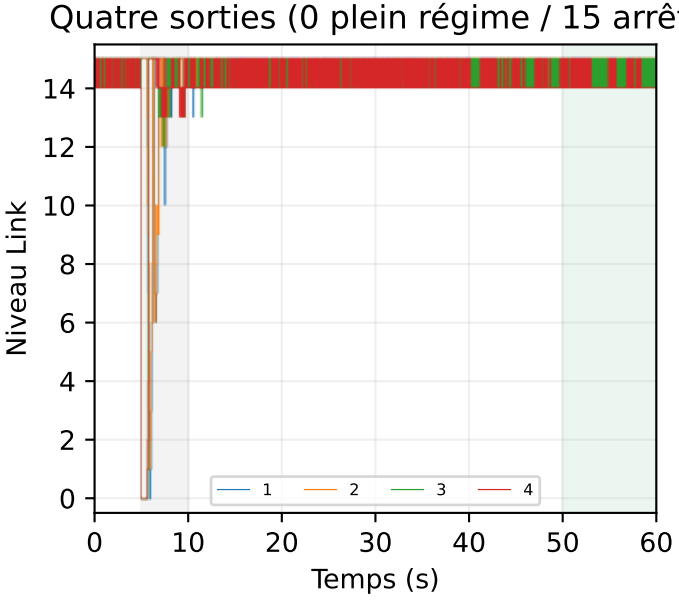

Aucune touche ; inversion instantanée de 180° à 5 s. Perte d’altitude publiée.

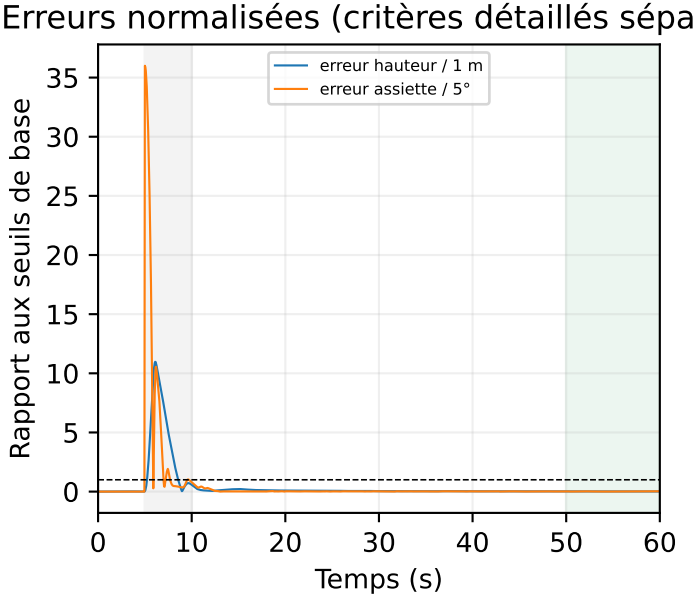

Erreur finale hauteur 0.012 m ; excursion finale 0.039 m ; assiette finale max 0.165° ; freinage — s. Critères échoués : aucun.

Gris : commande principale. Vert : fenêtre finale de stabilité. Modèle synthétique ; aucune qualification Minecraft.
